Small bathrooms may seem like a difficult design task to take on; however, these spaces may introduce a clever design challenge to add to your plate. Creating a functional and storage-friendly bathroom may be just what your home needs. Every design element in a small bathroom should have a purpose and be functional in some way or another to create a space-saving sanctuary.

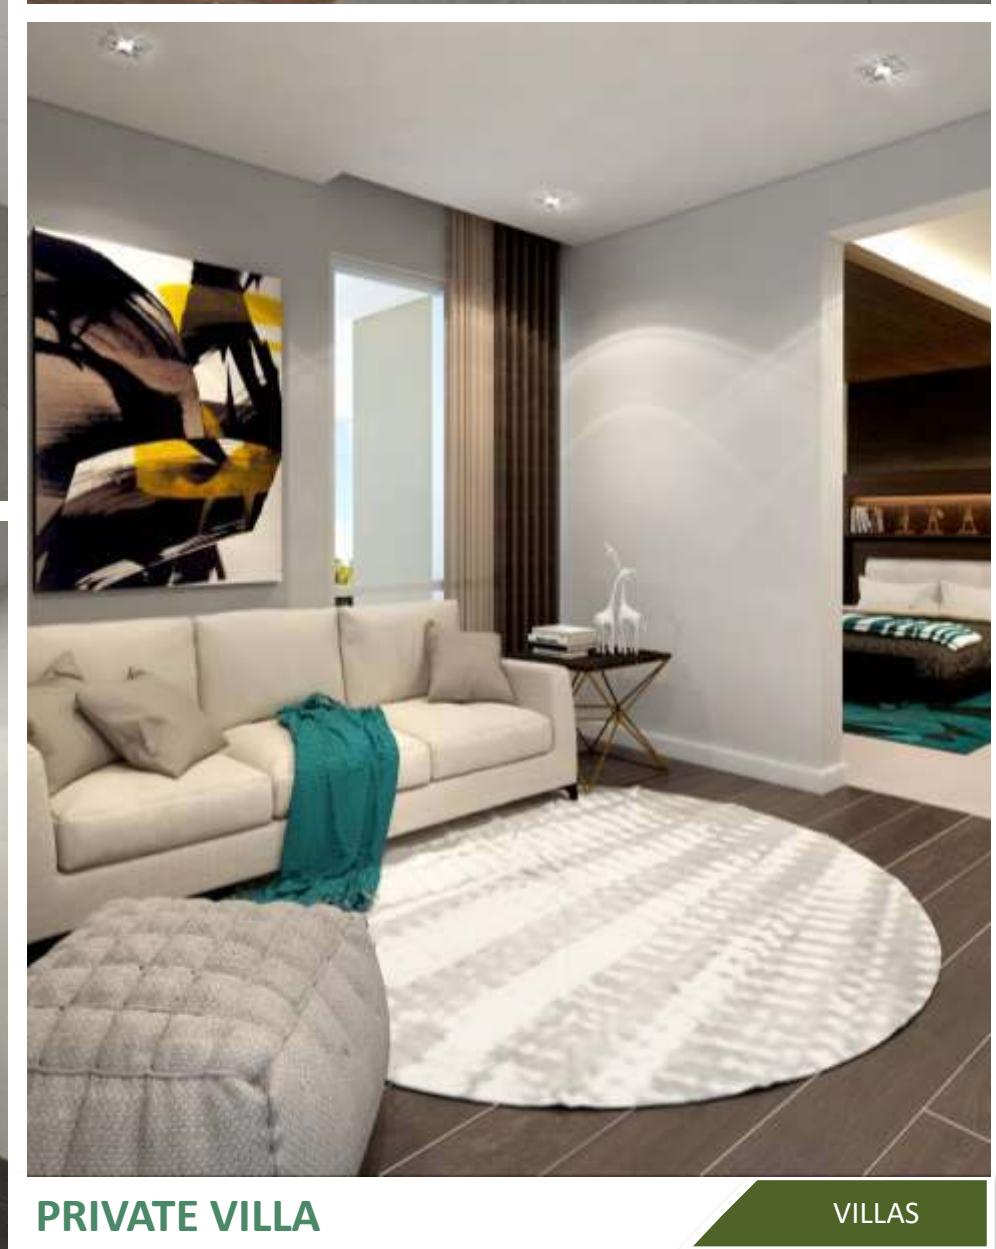

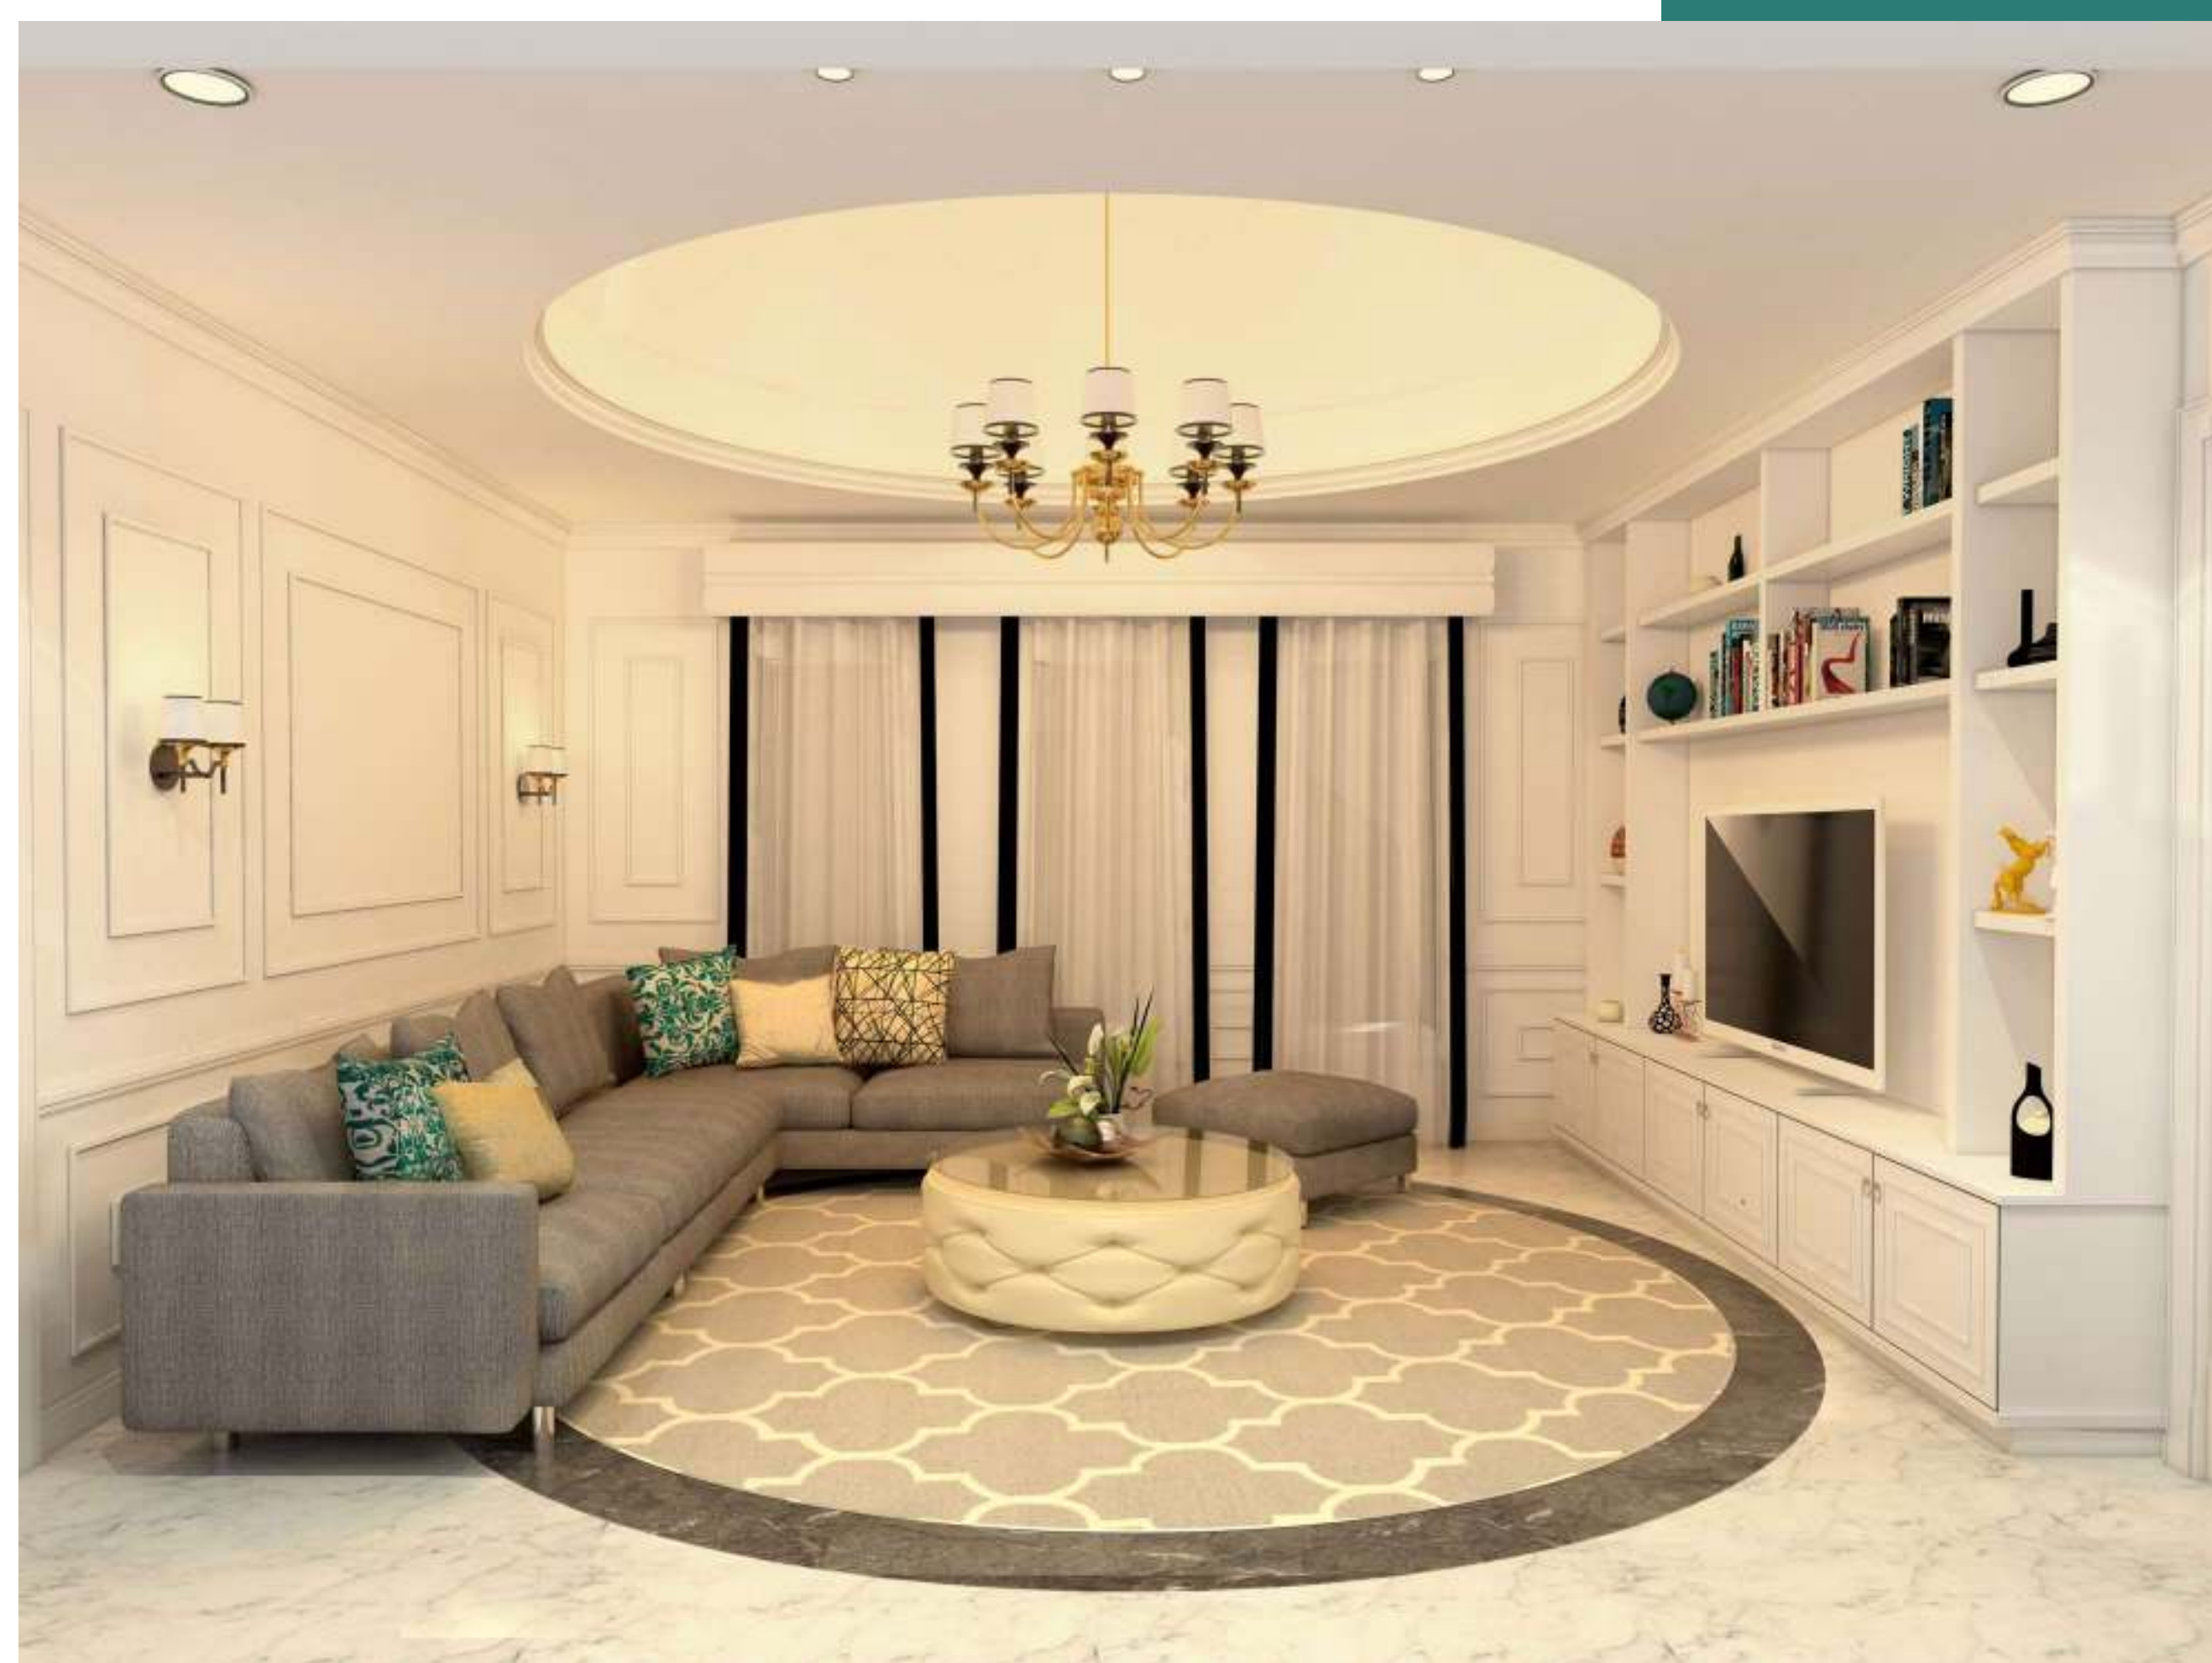

The home interior design is filled with a combination of open spaces and a subtle selection of colours and shades. The combination of luxurious materials, including the use of wood, marble, metal and delicate fabrics create luxury atmosphere where it is pleasant to live and receive guests. The house has a large ground floor. Here, the hosts receive guests, communicate with family and friends. The staircase leads to the second floor. Color is a major element in scale. A small room can have a larger look by the use of closely related values, hues, and intensity. A large room can be made to look smaller by marked contrasts of color and values, hue, and intensity. Value is one of the most important elements. Whether light or dark, little value contrast makes for unity, and sharper contrast makes for stronger punctuation

Forms, materials, light and furniture create an impressive effect. The result is an excellent synchronization of modern luxury and lightness.

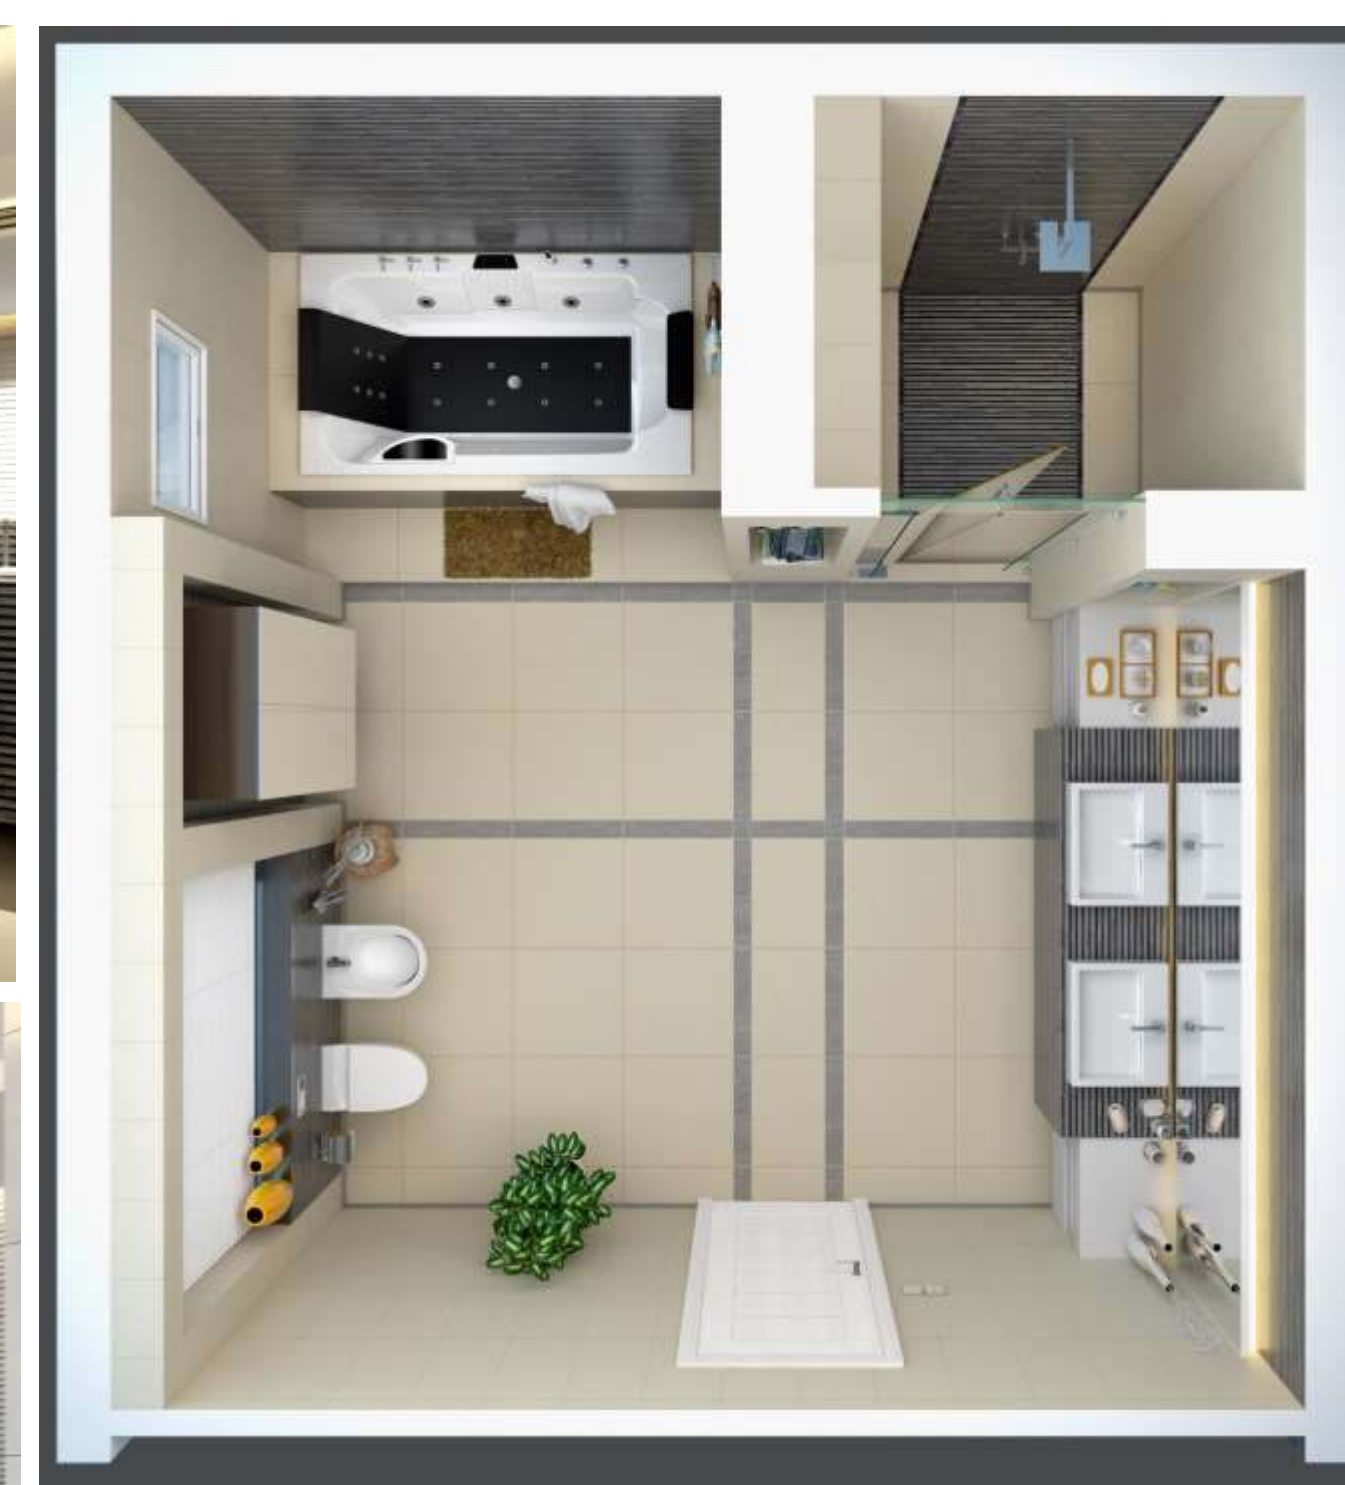

The interior turned out very refined with its own unique character. The interior design of the house includes many-sided solutions. Each room has a bright image while remaining a harmonious part of the overall space. The design of the house inside is filled with warmth and freshness. This is promoted by the prevailing gamma of pastel gold shades.

Simplicity is a rule of thumb for modern design. Make sure that you are keeping open and organic space free of clutter. Use built-in shelving and cabinetry to hide unwanted personal items. Leave all toiletries and novelty items out of your bathroom space, this is a place for relaxation and clean design, don't clutter it up with things that are unnecessary. Choose tile and backsplash with straight lines to add interest and character without sacrificing minimalistic design. Adding a touch of greenery in the bathroom creates a connection between the indoors and outdoors. Organic design coincides with modern design, meaning that the natural outdoor space should easily mesh with the indoor space. Bringing the outdoors inside by adding an indoor plant or two.

Since bathrooms are spaces that we use everyday, their importance is far greater than we give it credit for. From bright and cheery to sophisticated and imposing, modern bathrooms have long gone beyond the limit of space. These modern details transform dull bathrooms into fantastic relaxation and refreshing space.

Decorating is like music. Harmony is what we constantly strive for. At home, we want a peaceful atmosphere where the objects are the notes and nothing is off-key. Create a proper sense of balance by spreading things out a bit. Consider creating a separate functional area in the bedroom

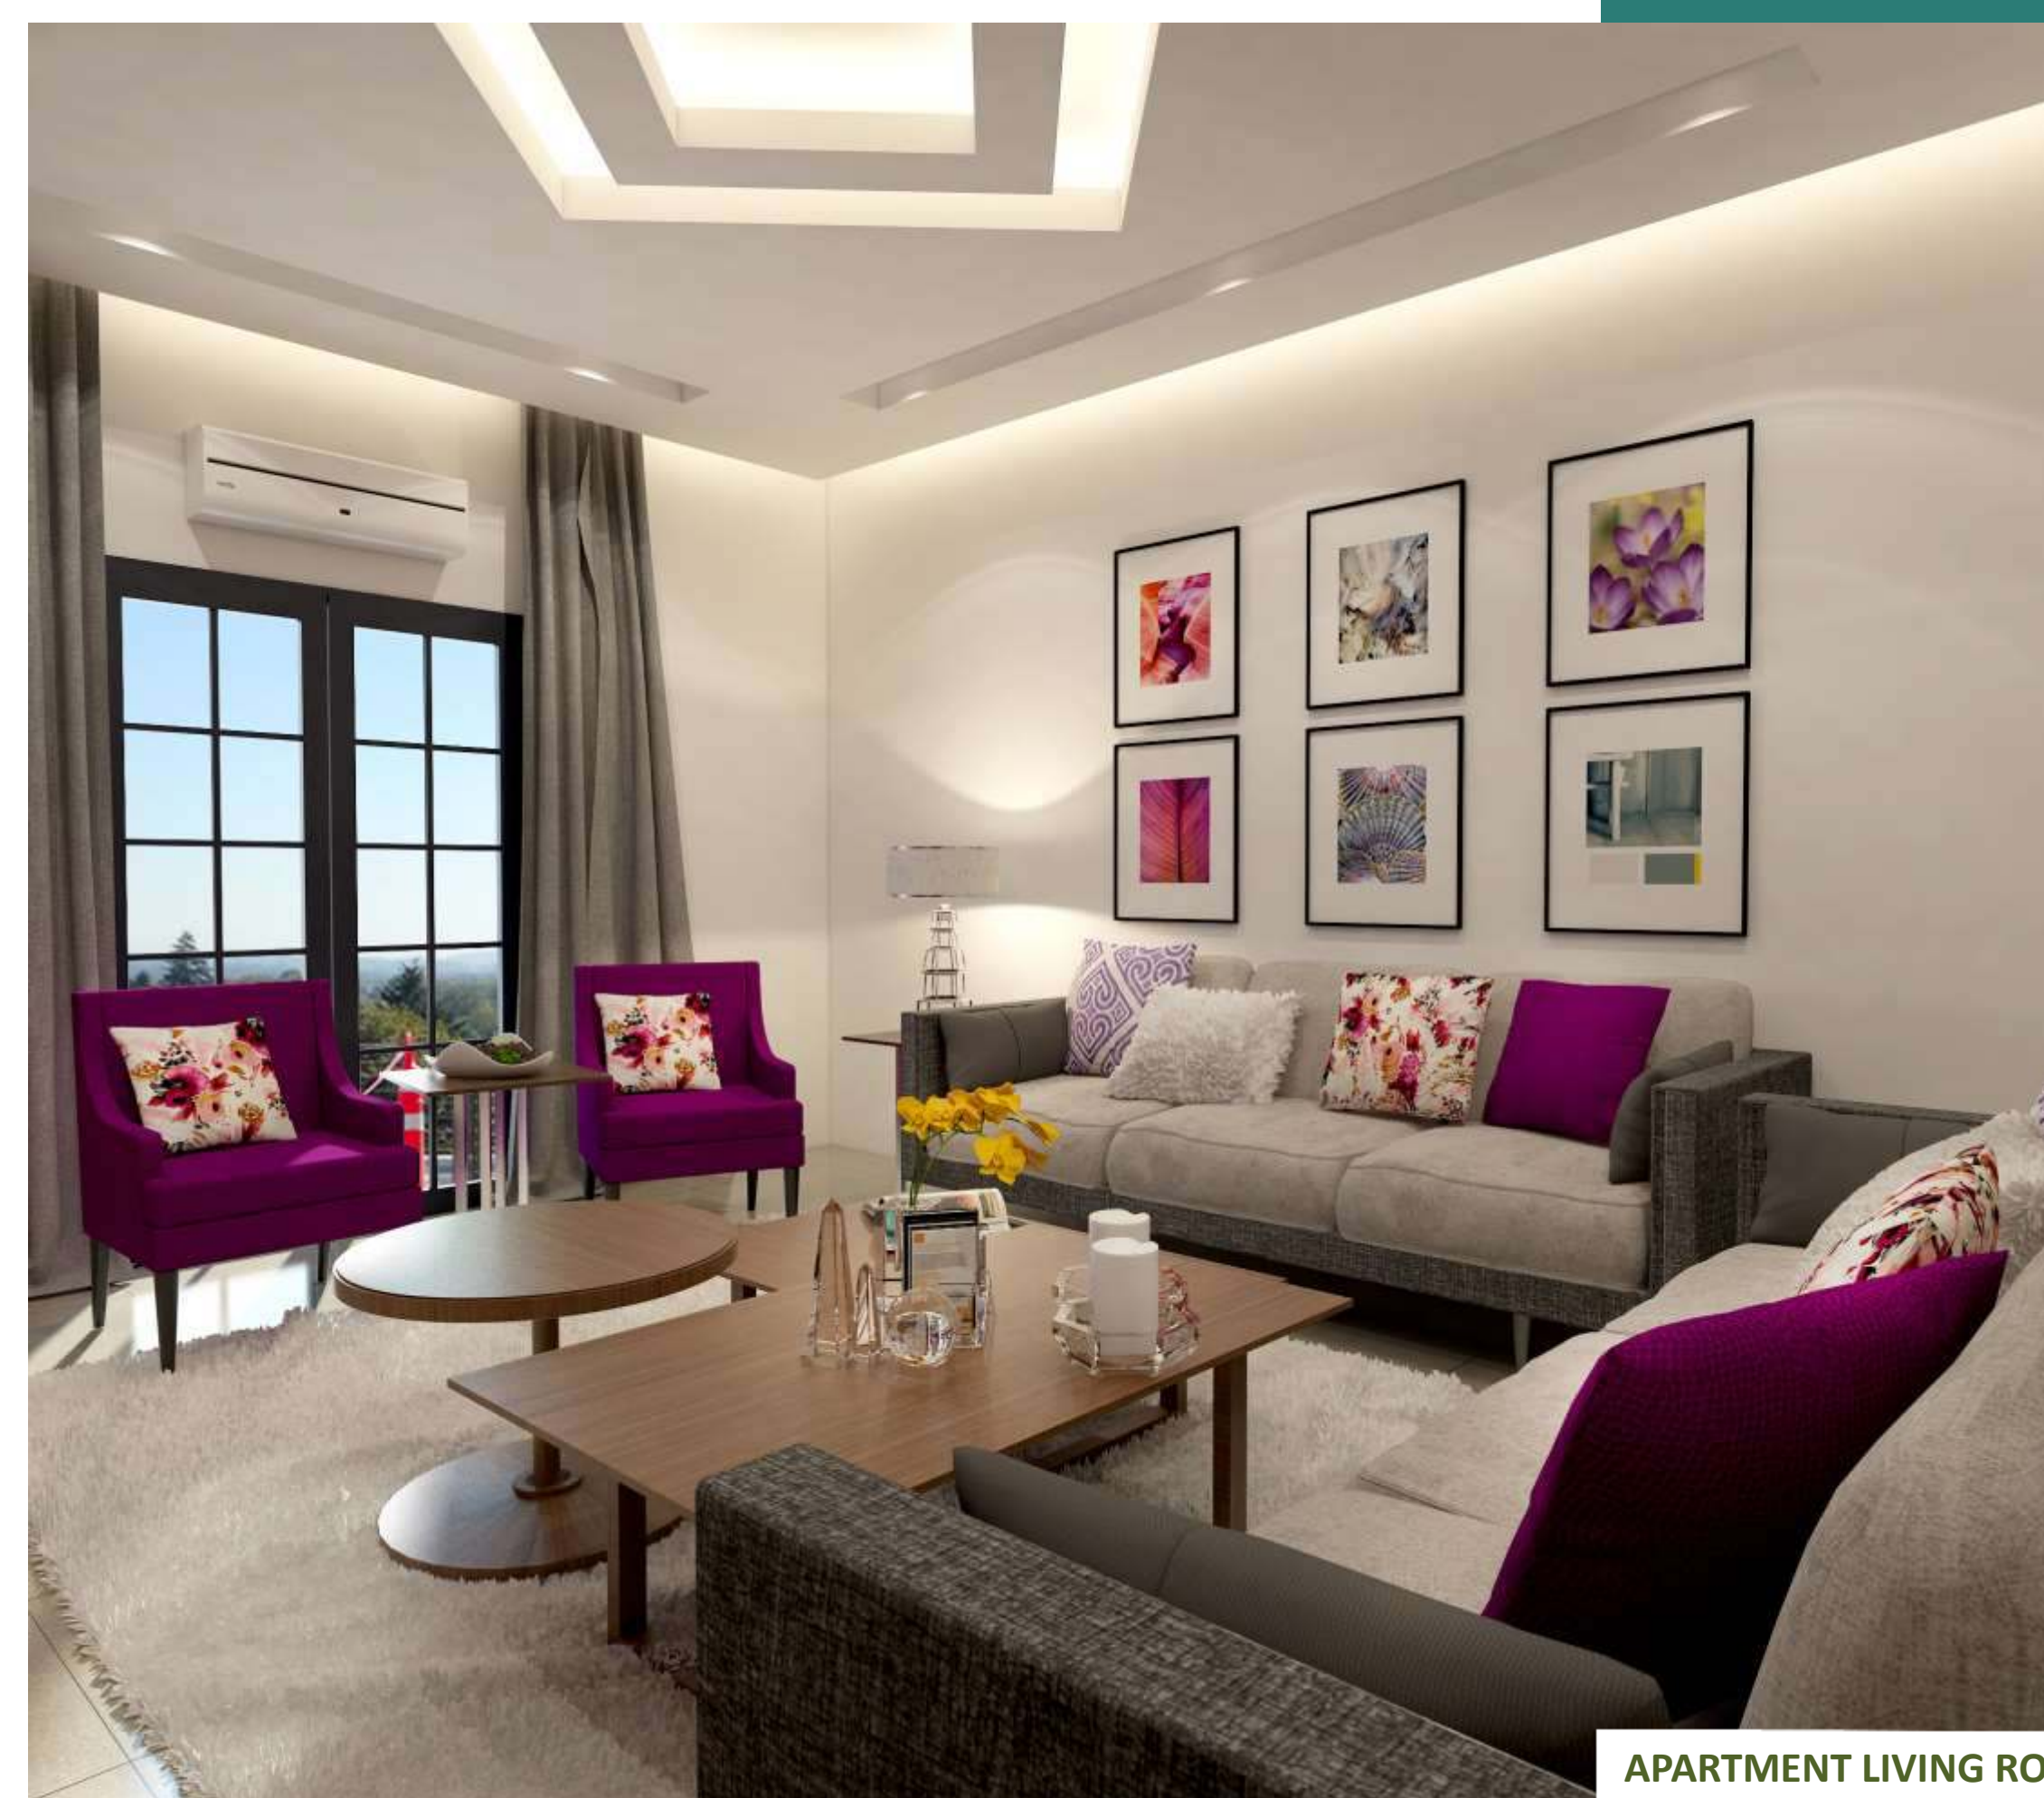

The modern majlis design is delicate and luxuriously styled. The quality of the materials and their combinations is an important part of the style. Small details, gold inserts, rims, carved mouldings create the desired luxury of the room.

The beautiful Mediterranean Restaurant also features a lavish terrace boasting unbelievable views of Dubai and the majestic Burj Khalifa.

Authentic and impressive, massive interiors as backdrop to sophisticated materials and refined, personalized, custom made furniture. A space where one can feel a synergie between classic craft and contemporary design. Subtly-chic, understated elegance interior.

The style of restaurants and bars corresponds to a common style concept. Capacity is calculated on the number of residents and guests. For breakfast, lunch and dinner, the catering facilities are filled with residents. The rest of the time the restaurant works for tourists of other hotels and local residents.

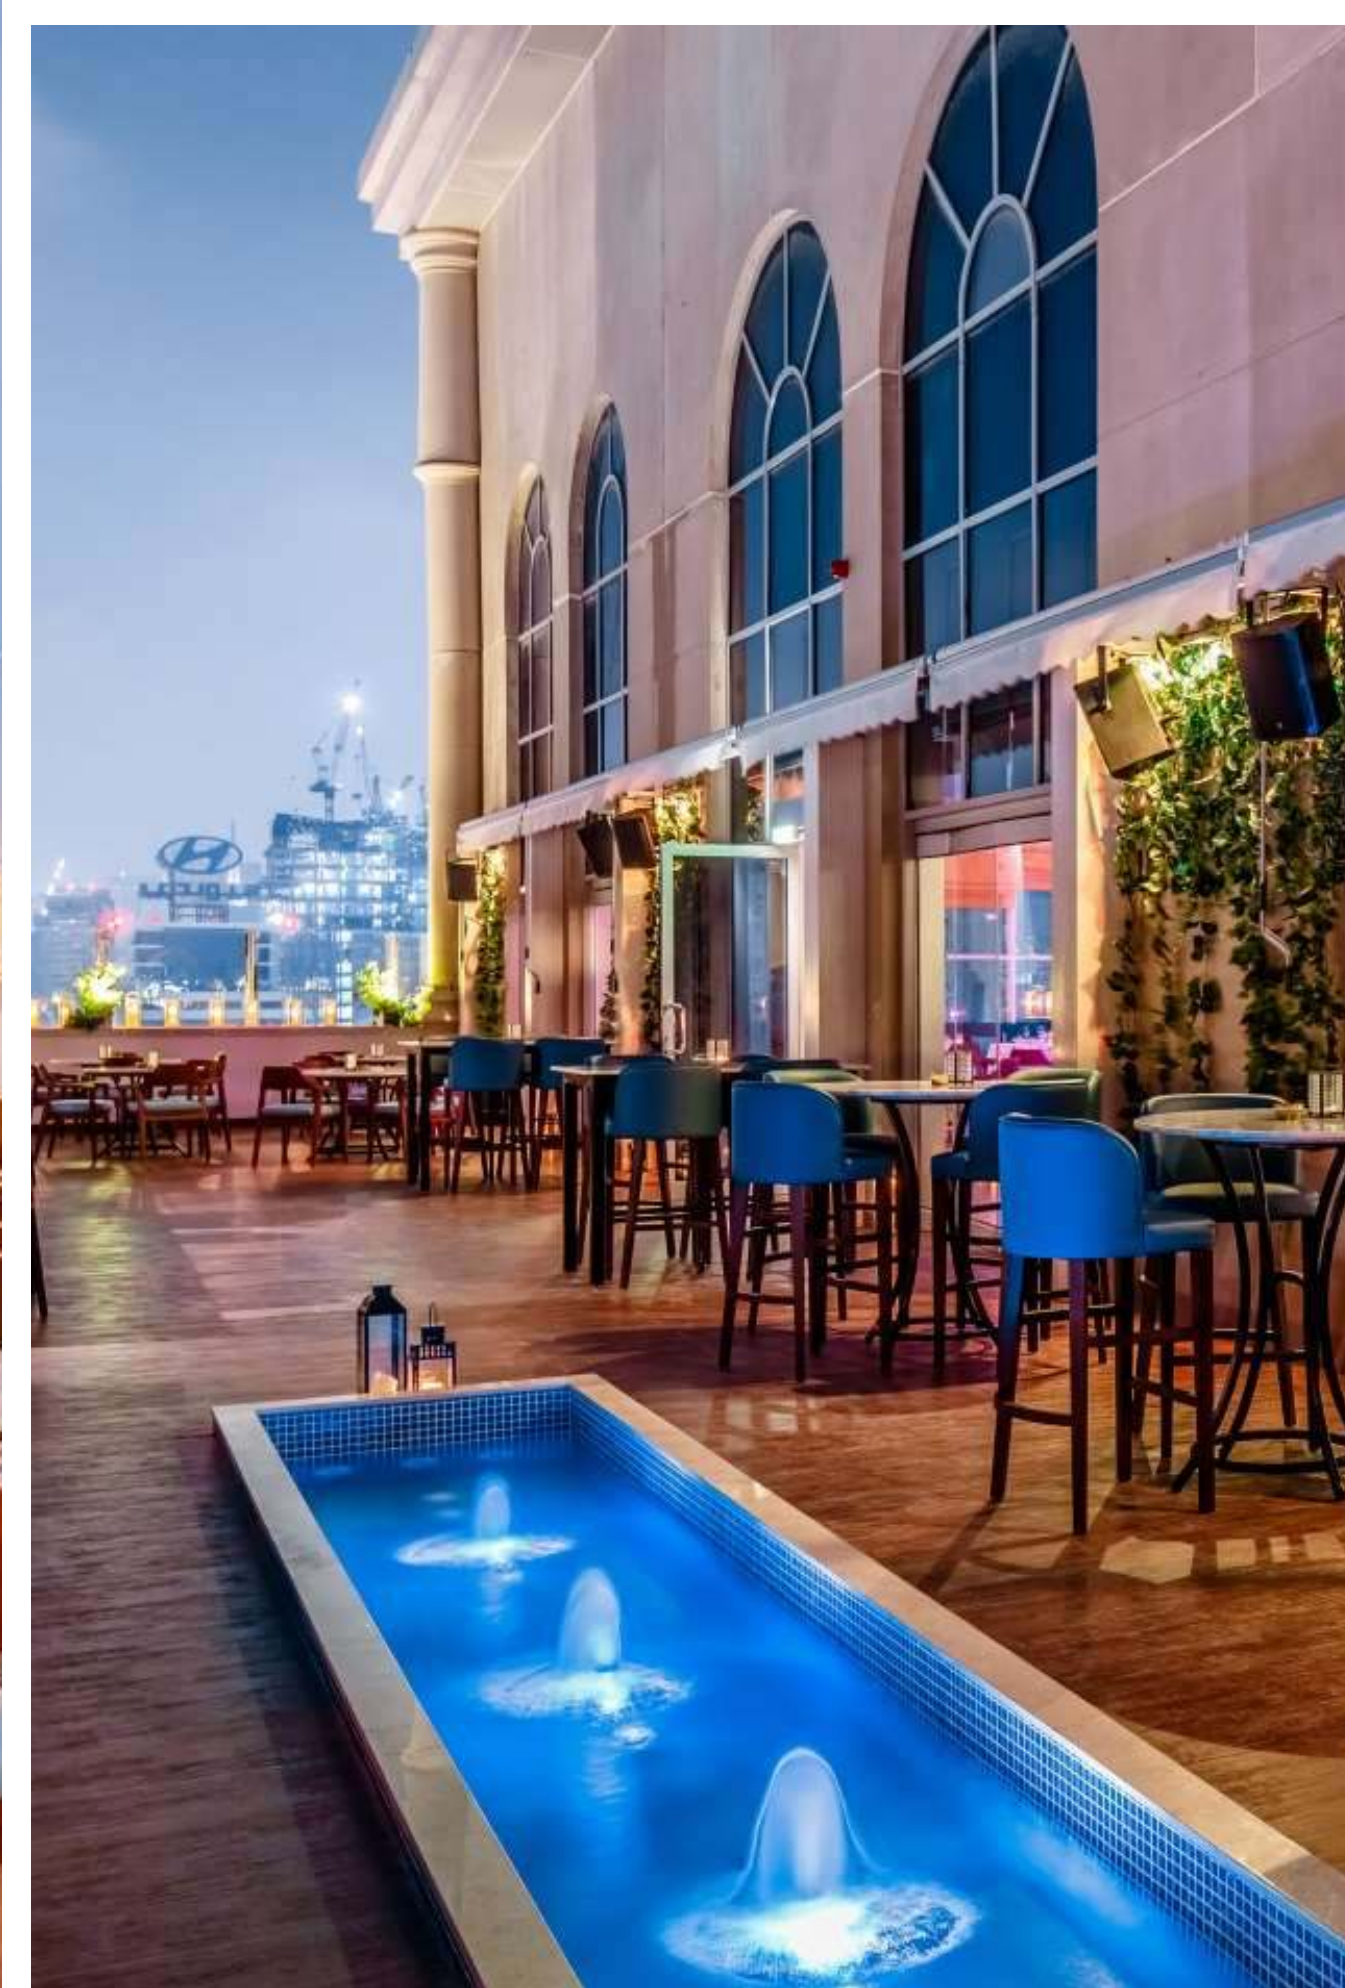

Featured symmetrical geometric shapes and they were not installed in parallel, in order to enhance the acoustic conditions of the house. This contemporary Mediterranean interior style traditionally features white stucco walls and white concrete floors with accents of wooden classic furniture & banquet seat cushioned cobalt blue. Roman curtain in mustard yellow fabric for glass window adds contrast to the interior. The use of wood floor and plants contributes the outdoor feel adjacent to outdoor dining. PIZZARIA ,If they see it, they will come. That's the logic behind the Pizzeria restaurant revamp. New store design plans include a viewing area in which pizza lovers can see the art of the dough, first hand. The effect is homey and unstudied, rustic, warm and sentimental. Which is exactly intended.

The tone is set in Dubai with two large lion statues sitting either side of the venue's garden entrance, while what looks like a Greek goddess marks a small courtyard. Ushered inside by a polite hostess, the interior is rather tasteless: as though Marie Antoinette's boudoir was spewed over an art-deco '70s apartment., entitled 'guess which feature I think is the most ugly'. We were torn between the pink chandeliers and the leopard-skin bar stools, but do tell us yours.
