# WHO WE ARE

## DAR AL OMRAN Engineering Consultants - Dubai

DAR AL OMRAN Engineering Consultants (DAO) is a multidisciplinary consulting firm, with a distinguished international presence in urban planning studies, architectural and engineering designs for local, regional, and international clients.

DAR AL OMRAN design solutions are directed to meet international standard in environmental and sustainability requirements using latest engineering techniques.

With a remarkable team of trusted and creative professionals, DAO strives to offer clients contemporary and innovative solutions that fulfill their aspirations and achieve their goals.

DAR AL OMRAN Engineering Consultants classified as Unlimited Building Height License and first-class consultant in the architecture and engineering services by the Dubai Municipality. DAO is an active member of many associations; the Jordan Engineers Association (JEA), A/E Business Council, Arab Association of Consulting Firms (AACF), and Federation of Consultants for Islamic Countries (FCIC).

DAO is an approved and registered consultant with the Abu Dhabi Fund for Development (ADFD), World Bank, UNDP, UNICEF, UN-HABITAT, USAID, Inter-American Development Bank, Islamic Development Bank, Saudi Development Fund, Arab Fund for Economic and Social Development, Kuwait Fund for Arab Economic Development, and BADEA.

Adherence to local and international standards is one of DAO's strengths as a leader in the A/E industry. DAO is ISO 9001 certified since 1998. DAO also has a Quality Management Certificate that meets the new requirements and standards of ISO 9001:2015, since 1998.

In addition, DAO ranked 195 among the Top 225 international design firms for year 2020 within ENR record.

# WHAT WE DO

## VISION:

Leader in shaping and delivering contemporary designs, inspired by nature, guided by culture

## MISSION:

We assess by sense, design by challenge and deliver with excellence

## CORE VALUES:

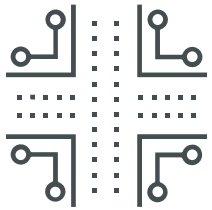

1. Strive for excellence
2. Trusted
3. Embrace each other
4. Passionate about what we do

DAO continues to maintain its position as a leading firm across the region, by proved professional planning architecture and engineering services in several countries like United Arab Emirates, Saudi Arabia, Iraq, Kuwait, Qatar, Oman, Yemen, Jordan, Syria, Lebanon, Palestine, Egypt, Libya, Morocco, Nigeria, Spain, Pakistan, Kazakhstan, and Malaysia.

Throughout the 40+ years of DAO's impressive track record, DAO has attracted some of the most exceptional talents in the region in all disciplines of our practice.
Integrity, discipline, accountability, trust and compassion are values that shape our professionals' conscious across our offices.

For clients throughout the region and beyond, from Kazakhstan to Morocco and from local to international markets, DAO has delivered resilient design solutions and construction supervision services in over 18 countries, and has gained the highest trust of a wide range of Clientele.

The Firm also provides professional services in Value Engineering, Design Review and Verification, and BIM Applications.

# URBAN AND MASTER PLANNING

## REGIONAL & LOCAL PLANNING

The art of integration of design, engineering, and the social sciences is the essence of our Urban & Master Planning thinking. Human comfort and happiness are in the center of it all. Our sincere devotion to the environment and preservation of natural resources runs parallel to our love for creating healthy communities and sustainable developments.

Rapid changes in technology and science is changing the urban fabric of communities and the allocation of resources. DAO's Urban Planners are deep-rooted in their communities and locale, and are driven by their aspirations, but their skills and knowledge transcend boundaries and regional limits. We treat each project with careful and thorough understanding of the issues to emanate solutions that serve people through growth and sustainability.

# CIVIC
## PUBLIC SERVICES WORKPLACE

Civic architecture and public institutions are echoes of the community. Societies thrive when their public
institutions, museums, libraries, and courthouses function well in their domain. Public places of sophisticated designs bring communities together, invoke the inner sense of belonging among the residents, and most of all, create that irreversible bond between people and their settings.

Through our extensive knowledge in civic architecture and a profound sense of civic responsibility, DAO has contributed significantly to creating many local landmarks across the region. The list includes embassies, courthouses, ministry buildings, ruling palaces, municipalities, and many others.

DAO has received high acclaim for the architectural design of the justice palace landmark in Riyadh, KSA.

# EDUCATIONAL
## FORMING & LEARNING

A closer look at the needs and ideas of faculties and the operational requirements of all users will undoubtedly lead to more intelligent and better architectural solutions.

DAO's qualified team is committed to adopting and emulating our clients' vision. Thus, we are providing efficient and functional buildings and facilities through extensive research and analysis incorporating the latest processes and technologies.

DAO's extensive portfolio extends over 40 years of integrated designs of educational projects, schools of different types, interdisciplinary universities, and many educational facilities. We never cease to reflect the clients' goals for providing a brighter atmosphere and a more sustainable milieu for its students.

# HEALTHCARE
## HOSPITALS, CLINICS, & LABS

Creating synergy between talent and science is the basis for all of DAO's designs. We believe the architect is the catalyst that will nurture collaboration and build alliances to bring about a holistic end-result and a healthier architectural product.
The rapid change in the medical sciences and diagnostics adds to the already complex nature of healthcare facilities. Therefore, planners and designers must not overlook this when dealing with such sectors. Overcoming challenges and crafting more responsive and adaptive solutions is DAO's forte and spirit.
Healthcare facilities operate and serve two opposites at the same time. Therefore, operational sensitivities are crucial for creating a seamless and positive environment.
One of DAO's chief goals in healthcare designs is to create nurturing settings that promote peace and tranquility and foster healing within its bounds for both patients and other users alike.
DAO's impressive track record in the healthcare sector is a testament to our commitment and dedication.

# CULTURE
## PAST & PRESENT

Architecture is a conduit to express and transform culture. The environment we live in, the place we call home, and the community we belong to are all elements that shape our culture. We at DAO embrace and revere these essentials when we create ideas of civic prominence and cultural impact.

While culture can be a stimulating and energizing force in the making of our identity, our designs can change the way people relate to their culture and environment. Thus, our designers are bent on creating sustainable architecture that serves people, arouses their senses, endures through time, and preserves mother nature.

# HOSPITALITY
## HOTELS & LEISURE

Memories have a powerful connection to "the place," this place could be a street corner or a piazza, a beach, or a hotel. Memories are timeless emotions that captivate our perceptions of events. The pictures we see, the colors we face, or the textures we touch are all ingrained in our memories to remind us of our experiences and involvements.

DAO draws on this human connection to the built environment throughout the design process and evolution. Creative synergy amongst all disciplines allows us to articulate each project's needs and concepts to achieve a memorable luxury and inspiring "place" for all users. We strive to create a hospitable architecture that resonates with comfort, full of spirit, yet exciting.

DAO's clients include some of the region's renowned names in hospitality projects, such as Movenpick, Hyatt, Intercontinental and Rotana.

# RELIGIOUS

## MOSQUES & ISLAMIC ARTS

Religious structures have originally been centers for worship, social assembly, and education. They gravitate people around them, act as the nuclei for the community's aspirations and solidarity.

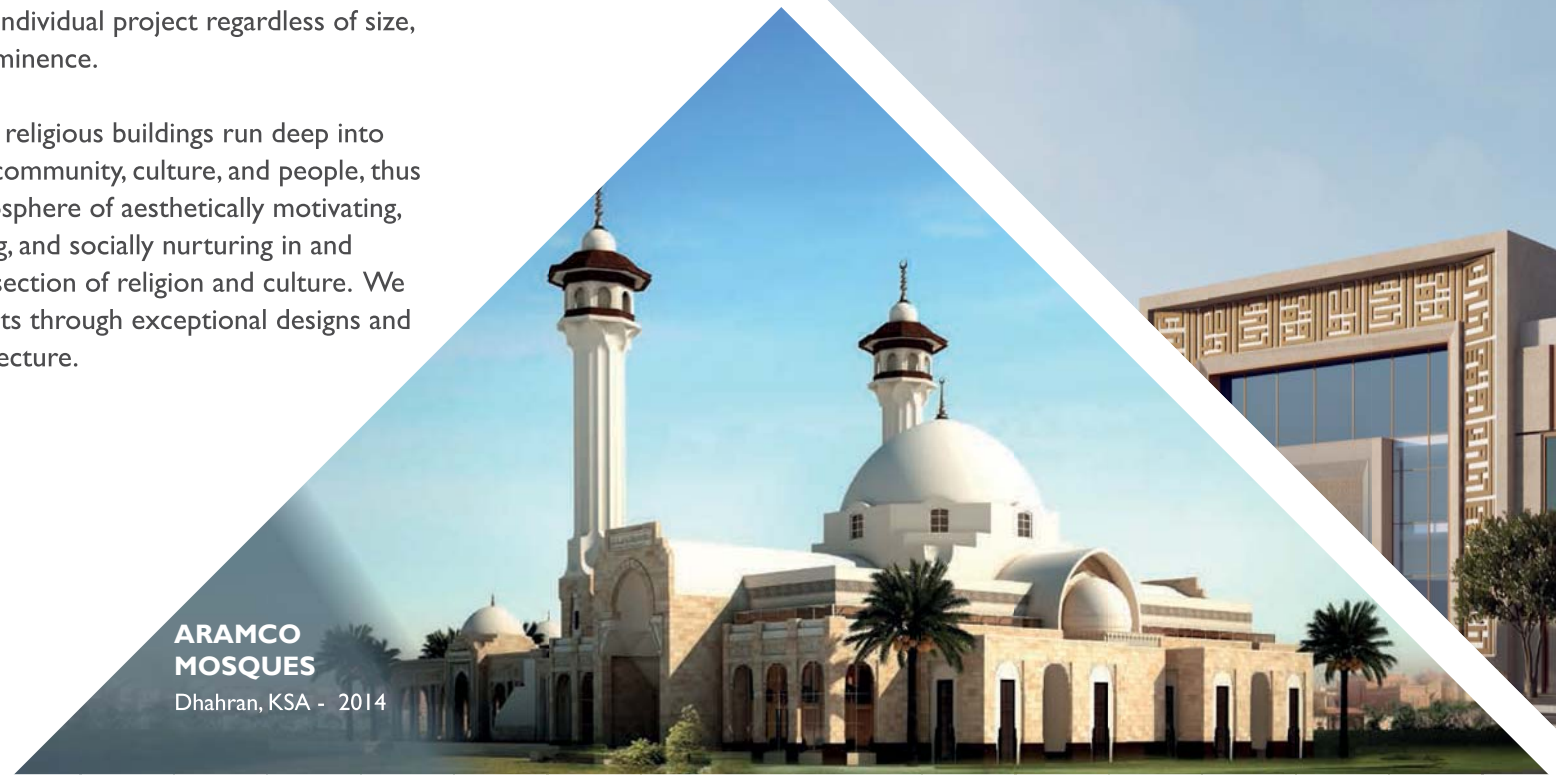

DAO's professional team of architects and interior designers are deeply dedicated to their research and analysis of every individual project regardless of size, location, and prominence.

DAO's designs of religious buildings run deep into the roots of the community, culture, and people, thus fostering an atmosphere of aesthetically motivating, spiritually uplifting, and socially nurturing in and out. At the intersection of religion and culture. We express our talents through exceptional designs and stimulating architecture.

# COMMERCIAL
## MALLS & RETAILS

Commercial centers are increasingly shifting away from the traditional concept of retail as the technology is changing traditions and human habits, creating new ones and isolating others. Architecture is one human expression that will also adapt to this imminent change. DAO's leverage is "resilience in design." We embrace new technologies to advance innovative solutions.

Change in human behavior precedes change in the built environment. The rapid industry trends are causing tremor to the old thinking of doing commerce and trade. We anticipate change before we design, and design to affect it. We help our clients understand the currents to turn challenges into attractive opportunities.

## CORPORATE WORKPLACE

People spend more time at their workplaces than at home. Although designed for comfort and productivity, workplace trends keep changing with new technologies and scientific research, change in human behavior, and innovations of new materials.

We design workplaces with all users in mind to deliver a creative, comfortable, calm, and energy-boosting environment. DAO's designs endorse the office culture, and brand, yet promote efficiency and functionality. Essentials to DAO's design of office buildings are adaptability, resilience, sustainability, and the embrace of the latest technologies. We take rigorous steps to make sure that our clients' aspirations are carefully analyzed and skillfully narrated into the designs of our architecture and interiors.

# RESIDENTIAL
## HOUSING

While Housing developments may point to the socio-economic status of their users, private dwellings, on the other hand, reveal a much more personal side of their owners such as their artistic tendencies, social standing, value system, aspirations and even in many instances their political orientation. No matter who the user is, the home will always be the ultimate refuge for humans where comfort, peace, and tranquility exist regardless of the physical and modern measurement of luxury.

DAO's insightful architects and planners have a distinctive responsibility in translating the aspirations of the community they serve and integrating systems and technologies while safeguarding the environment they embrace.

# INDUSTRIAL
## WAREHOUSES & FACTORIES

Industrial architecture in the past was merely confined to cost and function. DAO's professionals go beyond that. We dig deep into the socio-economic impact of the built environment on individuals and the community at large.

While still working on stability and solid construction of the project, we can't but focus on creating harmony and coherence within all elements of the design. With aesthetics being an indispensable expression of vitality and recognition, DAO strives to maintain an ecological and economic output collectively.
