INTERIOR DESIGN

Creating the art and science of
holistic interior design

BUILDING YOUR DREAMS

iMaker Group is a renowned architecture firm based in Dubai, United Arab Emirates. The Luxury Lifestyle Awards named them Best Architect in the category of Best Luxury Architecture (Single Residential Project) 2022. Architecture, interior design, and landscaping are among the services offered, with an emphasis on luxury living, exclusive bespoke design for clients, and the creation of luxurious spaces.

iMaker Group facilitates transactions by providing turnkey solutions. From concept through completion and handover, we›ll take you through the entire process. We never fail to deliver when it comes to ideas and execution. Our architects, interior designers, and engineers are not only talented but also resourceful, providing practical solutions to difficult design requests and assuring the best possible outcome.

Creating designs in modern, contemporary, new classic, and even neo-futurist styles. If you can dream it, we can build it!

DESIGN VS. DECORATING IN A NUTSHELL

Interior design and interior decoration are fundamentally distinct disciplines, despite occasional overlap. Interior decorating is the furnishing or embellishing of a place with ornamental materials to achieve a certain aesthetic, whereas interior design is the art and science of understanding people's behavior to create practical spaces within a building. In other words, decorators may not design, but interior designers may.

PROVIDING TOP NOTCH INTERIOR DESIGN

Our talented and experienced design team collaborates with our clients, ensuring that we provide only an over-the-top experience.

We take care of all interior elements and attend to every detail. This includes interior fit-outs, finishes, furniture, and accessories.

DESiGN
PROCESS

Design can be viewed as a strategy of problem solving in which creative ability utilizes arts & science to generate solutions to problem situations. Going through a pattern or sequence of steps. Design process and methodology play a key role in the development of innovative design solutions.

INSPIRATIONS

sparking creativity

It begins with an idea, and great ideas require inspirations in order to spark.

Well, it's the creative process – research and inspiration. Development of ideas. Refinement and craft. You have to dig deep into the problem at the beginning and find that wee gem of an idea to spring board into something big. A truth you can then develop and craft into something beautiful. Feed your eyes and your senses and creative things start to happen.

We collaborate with our client's needs and desires creating moods that we will then provide our designers to create the visuals on a latter stage.

typical bedroom

seating area mood

The following images are examples intended to give a rough understanding of the client's preferences and style. This mood board aids in setting the general atmosphere for the area that will be furnished and designed. There will be several options that will be provided to the client and will be streamed line during client meetings.

Once the mood is established, we move on to provide a visual of the finishing design, which displays the empty space together with its walls and flooring. Then we would arrange the materials, furnishings, fixtures, and lighting.

FINISHING DESIGN

Walls, moveable partitions, and ceilings have exposed inner surface materials. This includes the substructure of drywall, masonry, or wood, as well as surfacing materials such as paneling, tile, or other interior nish material, as well as any surfacing materials added to it, such as paint or wallpaper.

The following material options are only samples and is not related to the actual output.

Wall Texture

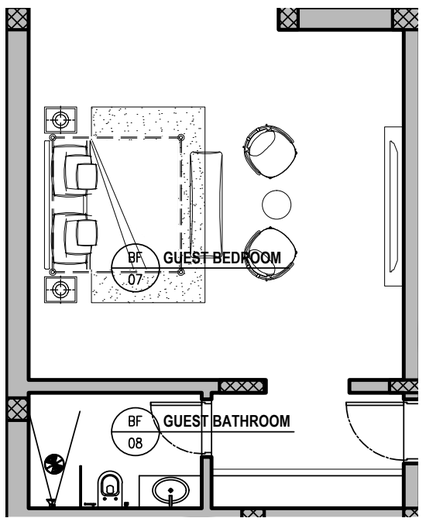

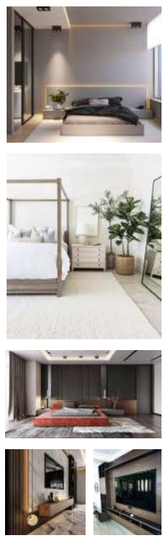

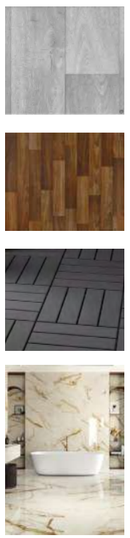

Bar Counter

Tiles

Paint Finish

Area	Plan	Finishing			Materials	Color Scheme	Lighting
		Walls	Floors	Ceiling			
Guest Bedroom							
Notes		• *Display wall with shelves, indirect lighting details.* • *Screen wall.*		• *Lighter color for walls*		• *Darker color scheme*	• *Light suspension above bed*

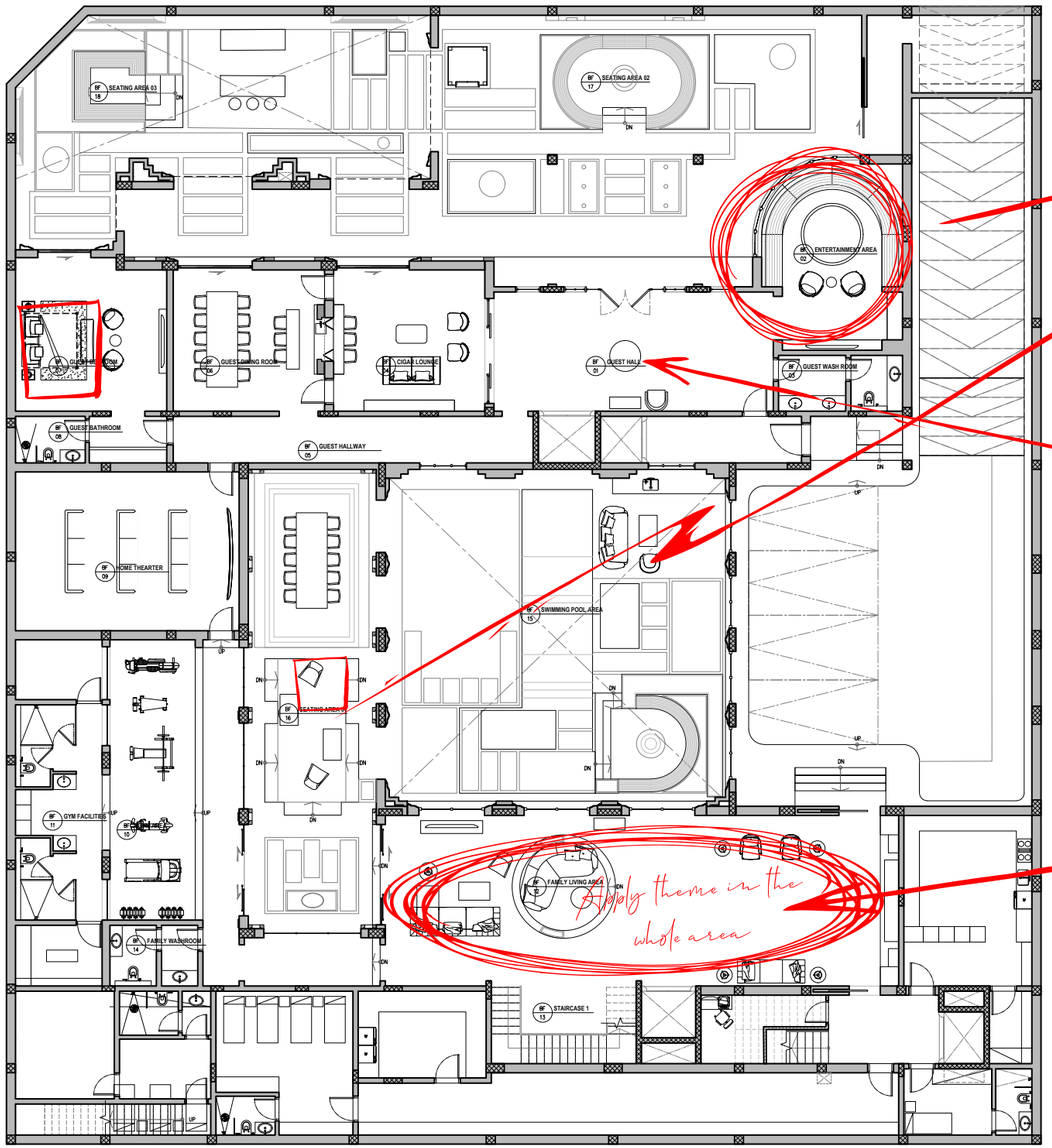

Above is a represantion of Finishing Details. This will assist in providing an overall idea how the spaces will be designed on a virtual 3D scale model. The consolidated concept and ideas will now be used for a richer visual experience.

FURNITURE DESIGNS

BASEMENT FLOOR PLAN

Proposing selections of furnitures, fixtures, and equipments. From this stage we start to define and consolidate selections for each spaces like the chairs, wall decoration, lights, consoles, etc. Once we finalize the selection we can proceed on the rendering of each spaces.

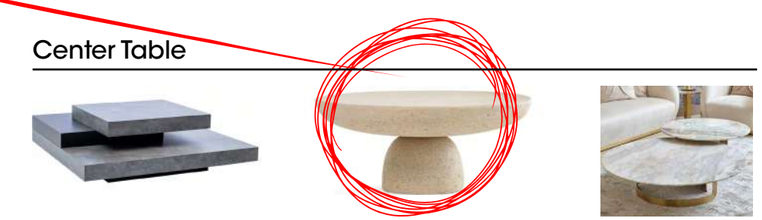

Chair Options

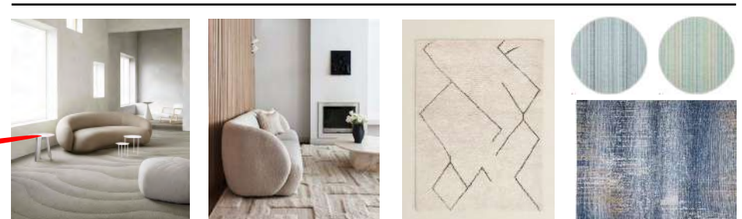

Master Bed

Center Table

Carpet Options

Couch Options

Lamps

Console

Dining Table

Guest Bed

Chandelier

RENDERS

We offer our clients lifelike 3D scale models of the interior spaces using the most up-to-date modeling and rendering software. This includes the application of all textures, a chosen selection of furniture, fixtures, equipment, lights, and other materials, as well as all approved selections of these elements. The room that will be developed can now be seen in rich detail thanks to this.

Be faithful to your own taste, because nothing you really like is ever out of style.

We have a history of offering industry-leading architecture, interior and landscape design which we are now building upon.

We have grown into a multidisciplinary, global design studio. We think of design as a process focused on discovery. Design research allows us to explore, develop, and provide smarter solutions. That's especially important as we seek to create a future that is more robust.

We offer designs that impress, captivate, and serve a purpose.

We believe that design can make people's lives better.
