WHO ARE WE?

MK Design was established in 2007. MK Design was the bridge of connections between design and client and between creativity and reality.

MK Design is dedicated to interior design space planning and landscaping of commercial and residential spaces. Our experienced designers and interior decorators objectives' are to meet the clients' tastes and needs, and engage them in every step of the design process to illustrate the concept that truly inspires.

WHAT WE DO

ARCHITECTURE

Develop your dream space specific to its unique intricacies and your needs. We help you draft your concept design and handle any documentation required to expedite approvals and begin your project.

INTERIOR DESIGN

Residential and commercial decor services tailored to fit your unique style and budget. From floor plans to installation, we'll guide you through the design process, sweating all the details so that you don't have to.

CONCEPTUAL DESIGN

We are able to undertake different types of projects with diverse criteria ranging from visual-appeal, innovation, to purely-conceptual. Regardless of the project, we are focused on problem solving.

LANDSCAPE

We design landscape architecture with a fundamental understanding of the place. Our designs reflect and preserve natural systems.
