"Architecture arouses sentiments in man. The architect's task, therefore, is to make those sentiments more precise."

Adolf Loos

N.design

Our Identity.

Innovative architecture for a better world!

We’re a design studio that believes in results, and the best results are a combination of comfort, wow-factors, space utilisations, the choice of furniture, and the quality of building materials.

We take pride in details, big and small. Our work, combined with your vision for the space, create a unique aesthetic that turns heads in awe.

We build visions, not simple spaces.

N.design

Vision

For each space, there’s a story to be told through its interior and exterior design. That’s why our approach is far more than just building a 3D model and calling it a day. We design to inspire, evoke emotions, and invoke comfort while taking in mind the wellbeing of the people who occupy these spaces.

Mission

For each space, there’s a story to be told through its interior and exterior design. That’s why our approach is far more than just building a 3D model and calling it a day. We design to inspire, evoke emotions, and invoke comfort while taking in mind the wellbeing of the people who occupy these spaces.

Communication.

Transparency.

Honesty.

Founder’s Message.

Life experience comes before spaces. That's why we design those spaces to fit the lifestyles of the people who live in them, capturing their soul before their vision.

Imagine what happens when an architect, a designer, and a technology specialist come together to explore all the possibilities of design.

We think about how to combine innovation and beauty with ergonomics, so our designs can stand the test of time.

Noor Saymeh

Founding Architect

N.design

Methodology.

For each space, there’s a story to be told through its interior and exterior design. That’s why our approach is far more than just building a 3D model and calling it a day. We design to inspire, evoke emotions, and invoke comfort while taking in mind the wellbeing of the people who occupy these spaces. By adding the professionalism of an engineer, along with our ability to adapt to any space we work with, we bring a soul to modern architecture.

N.Design Process.

Architecture is a passion, and a process. It’s an immersive experience that serves our client’s needs and requirements for comfort, space, and design.
That’s why we developed our own process which can be customized and personalized to each project in a way that ensures you’re already aware of every our client’s needs and requirements for comfort, space, and design.
That’s why we developed our own process which can be customized and personalized to each project in a way that ensures you’re already aware of every nook and cranny of your space before the design is executed into reality:

1. Bubble Diagram

2. Sketch Plan

3. Style Selection

4. Colour Selection

5. Material Selection

6. 3D model

7. 360-degree modelling (optional)

8. Video Animation (optional)

9. Virtual Tour (optional)

"In pure architecture the smallest detail should have a meaning or serve a purpose."

Augustus W. N. Pugin

Our Projects.

Architecture is a passion, and a process. It’s an immersive experience that serves our client’s needs and requirements for comfort, space, and design.

That’s why we developed our own process which can be customized and personalized to each project in a way that ensures you’re already aware of every
nook and cranny of your space before the design is executed into reality:

Innovative architecture for a better world!

“As an architect, you design for the present, with an awareness of the past for a future which is essentially unknown”

Norman Foster

N.design

Commercial architecture projects are a different breed than their residential counterparts. They often require a higher level of sophistication and greater attention to detail. At N.design, we consider the needs of the client, as well as the surrounding environment and community, to create a design that will stand out from the rest

“

“Architecture should speak of its time and place, but yearn for timelessness”

Frank Gehry

N.design

There’s More to Us.

Sustainability.

We understand that what we design and build today is meant to last, that’s why we build for the future and help our clients pick the best materials, and the designs that are meant to last.

Spaces That Inspire.

An architect is an artist who should aim for balance between space, design, colors, materials, and people. Our architects are masters of their craft and can adapt to every situation. We build spaces that are both comfortable and Functional

Customized Process.

An architect is an artist who should aim for balance between space, design, colors, materials, and people. Our architects are masters of their craft and can adapt to every situation. We build spaces that are both comfortable and Functional

“

One of the great beauties of architecture is that each time, it is like life starting all over again.
