Group of *Companies.*

*A*n International class soft furnishing division offering its service in Middle East and Asia Pacific Region, established in 2005 with a resource pool of senior professionals with over two decades of experience in handling major projects.

*I*n a short span of time, we expanded operations across the Middle East with an enviable track record of successful projects. Our aim is to achieve interiors that reflect the client's personality and life style with imagination and flair. To serve our clients, we have three units sharing one simple philosophy, quality of service, quality of design and quality of manufacture that comprises of Drapes Interio L.L.C., where you have a choice to take advantage of our interior and soft furnishing service. The division includes furniture showroom, fabric library and in house manufacturing workshop.

Strength.

FACILITIES

*O*ur infrastructure forms the back bone of our company. We boast of a skilled and trained work force, an efficient management and a production unit equipped with the requisite paraphernalia for manufacturing purposes, with a strong and sound network we are penetrating deep in the markets around the globe.

Our in house furnishing workshop consists of five divisions.

Which include the following units

- **Drapes Interio**

Acrylic Division
- **Skarabrae**
Furniture Showroom

Our Team.

A dedicated team that will live up to your expectations! The core team is lead by highly qualified professionals having solid experience in the industry, and the team is committed towards delivering high quality of service. Our realistic approach of transparency in operations, quality and time helps us to become strong in this industry.

Our Mission.

*T*o be the most preferred soft furnishing company, by way of honesty, and quality service in a cost effective timely manner.

WHAT WE DO.

We offer a friendly, professional and personal interior service specializing in both traditional and contemporary work. Our service includes made to measure sofas, chairs, tables, head boards and bed base, wall panels, poufs, curtains and all loose furniture's and fit outs. We work with you in each project, which is tailored to the individual. Whether you wish a single room or a whole project to be transformed.

OUR ASSURANCE.

*I*mpeccable quality has always been the hallmark of our products. Our products have been recognized for their workmanship. Our company enjoys a good reputation amongst our clientele as a result of high quality standards that we have been able to maintain since our inception.

We design and produce custom furnitures, sofas, chairs, dining table, ottomans and headboards, badbae fabric to suit your requirements.

• Novikov Restaurant, Dubai

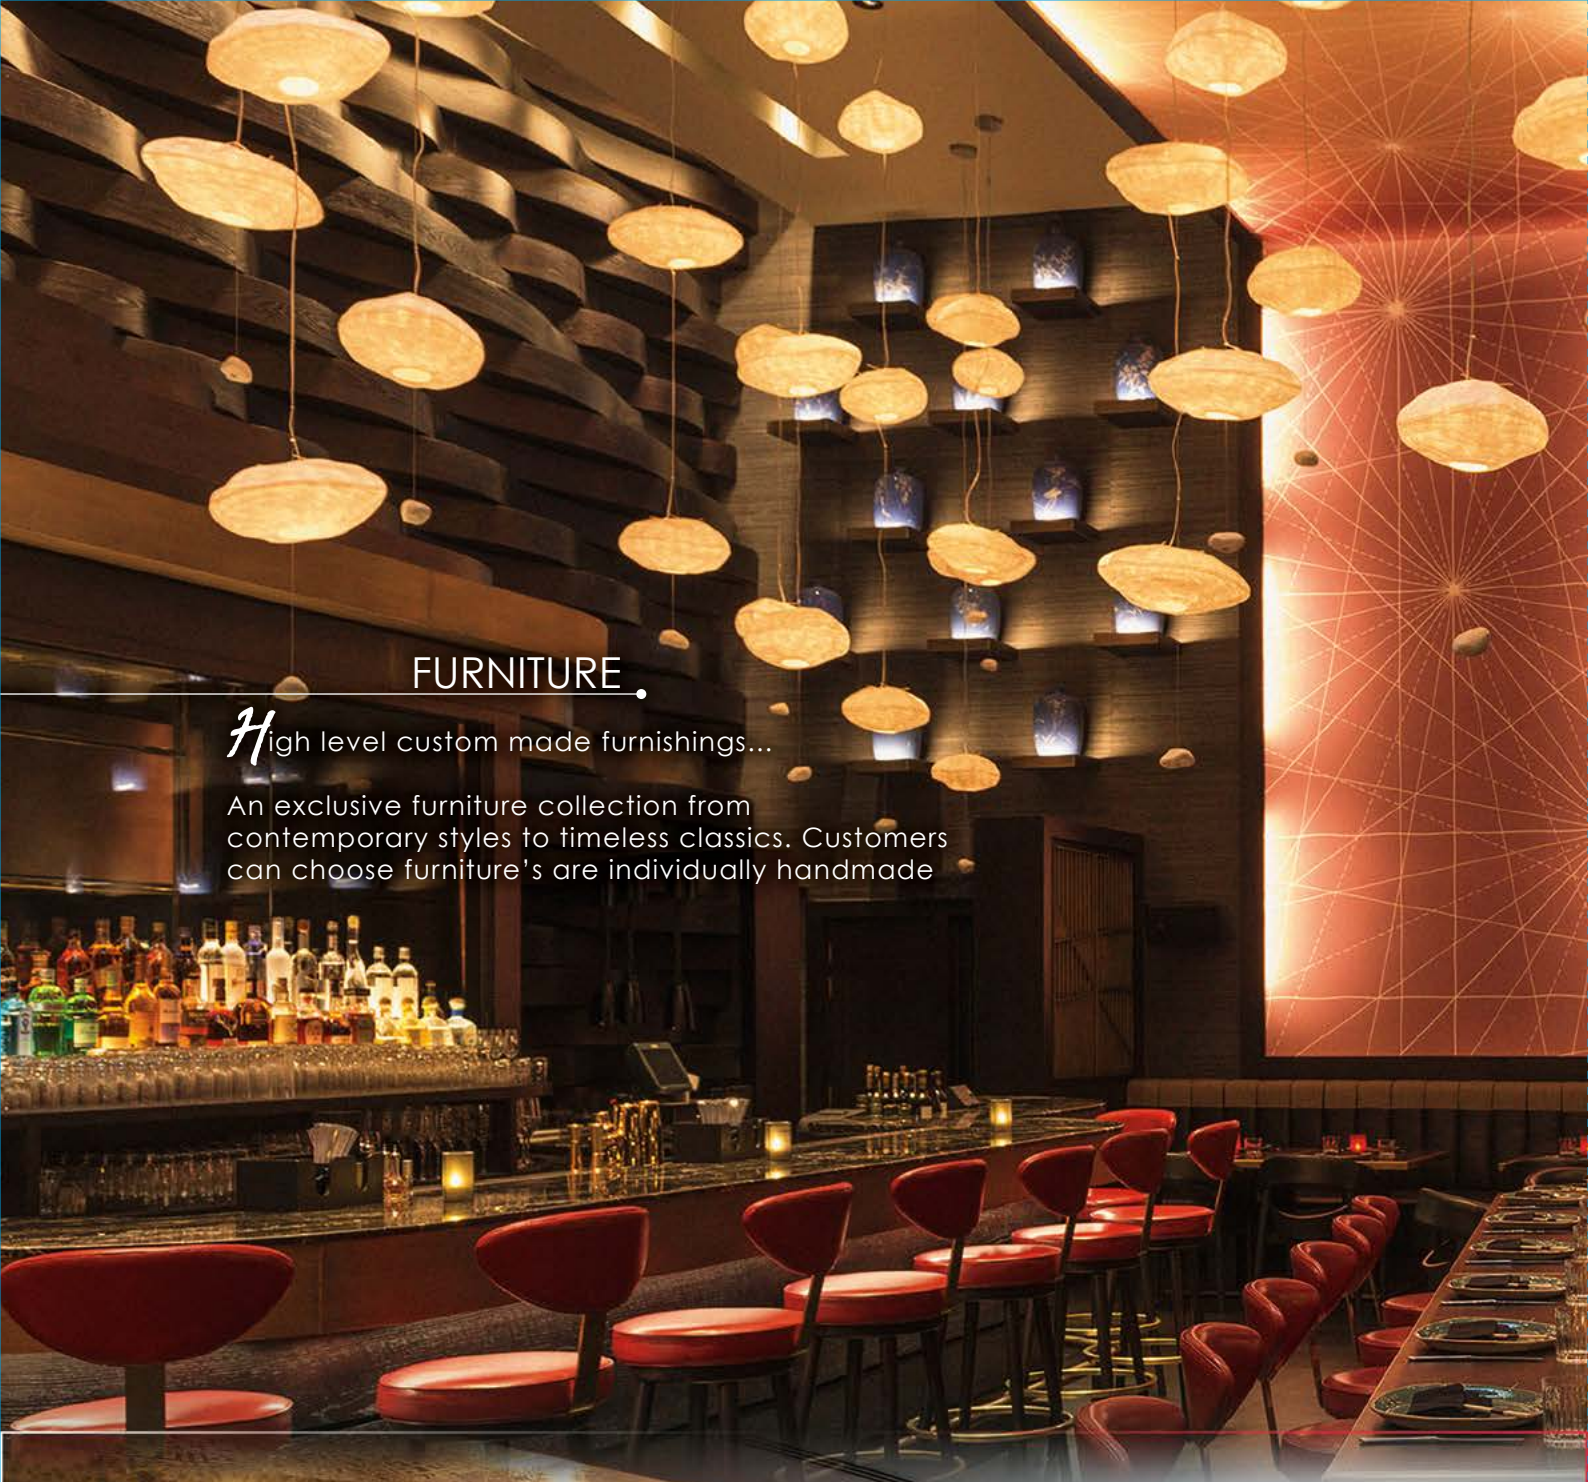

• Novikov Restaurant, Dubai

We have showroom stock but can also take your measurements and design a piece that will suit your home or office.

FURNITURE.

*H*igh level custom made furnishings...

An exclusive furniture collection from contemporary styles to timeless classics. Customers can choose furniture's are individually handmade

CURTAINS.

Curtains and blinds are made and fitted to the highest possible standards.

We are able to supply most types of window treatments with the best quality materials.

RE-UPHOLSTERY.

We do re-upholstery of couches, sofas, chairs, bedroom suites etc. it is much cheaper to reupholster than to buy new furniture yet reupholstering brings back the new look...

Fabrics are locked in at the seams and half widths, with hand metered and weighted - comes weather you order a single cushion or window dressings for a complete house, your project is seen through from design, measuring, ordering, checking fabrics, cutting to making up. Finally curtains are dressed, pressed and fitted by us.

FABRIC LIBRARY.

Local and imported fabrics and leather collection...

HOTELS & TOWERS *Projects.*

ACRYLIC *Design.*

Our factory is equipped with advanced international - level equipment and machinery to do any kind of projects with acrylic there are experienced technicians to guarantee the high quality and innovative products. We can design and manufacture various acrylic products, furniture's, display stands, we also produce and other.

We have our own corresponding superiority in high quality products and comparable prices to ensure continual development and grandness. We always try our best to provide customers with the best products and service. We hope to establish long-term business relationships with customers.

PROJECT *Management*

1 Installation and Project Management covers all aspects from initial meeting and briefing, through design concept, supervision at all stages of the project to completion, including the services of experienced project dedicated contracts managers.

Strict control of agreed budgets and time frames, including inspection of manufactured products, compliance checking prior to delivery to site with regular project status reporting.

Quality Control Procedures

The following detail will comprise the quality control procedure (QCP)

1. All work will be performed in accordance with the contract requirements; We will maintain an inspection system on a regular basis, in order to assure the contract has fulfilled the contract requirements. Any indication of system defined error, will lead to re-work on the product in order to assure and fulfill the contract requirements.
2. The QCP does not endeavor to summarize the contract requirements. It describes the process which We will use to assure the quality of product according to the requirements. Necessary details dealing with minor items will be overlooked in this procedure & will be addressed officially between the Quality Control Technician (QCT) and the project supervisor (PS), as the work progresses and will be documented as writing, if so requested by the PS. It is understood that the level of QC will be consistent with the contract.
3. The Project Manager will be responsible for the successful completion of the project work though HE/SHE has similar responsibilities on the other projects as well.
4. QCT will report directly to the production manager as well as the project manager. He will be responsible for the day to day fabrication process according to QC standpoint. He will assure that all required tests and documentation are completed and the results are furnished to the contractor in a time frame. QCT is authorized to suspend any operation which he deems to be in non-compliance with the contract.
5. As the number of operations or their dispersion on the project starts to over extend to QCT responsibilities will specifically be assigned to Our supervisory personnel specifically responsible for the given operations, or an assistant to him will be provided in either case, standards of application of QCP will be the same. The names experience and qualification of any personnel assuming QCP responsibilities will be provided to the contractor in advance.
6. We have an experienced and highly professional staff that will be responsible for the QC requirements, so we do not anticipate any personnel or training problems in complying with them. If any such problems occur, We will take necessary actions to assure the QCP which includes retraining with more supervision.

PREPERATION PHASE

- Organizing the work to complete it on time.
- Reviewing all contract requirements.
- Ensuring the component material will fulfill the contract requirements.
- Ensuring the equipment and professionals.
- Ensuring the samples had fulfilled the contract requirements and the same will be acknowledged by the contractor before the work.

START-UP Phase

- Reviewing the contract requirements with professionals who will perform the contract.
- Inspecting start - up of work which includes material and tie span.

PRODUCTION PHASE

- Providing the supervision from concept to completion.
- Conducting a regular inspection during the fabrication to identify the defects.
- Providing information to the Production Manager to avoid repeated defects.
- Ensuring the standard of workmanship, In accordance with the approval sample.
- Ensuring the product has been completed and delivered on time.

DESCRIPTION OF RECORDS

- Records of each process will be maintained for future references.

CONCLUSION

The Overall goal is to deliver finished products in quality and accordance to the contract requirements testing and inspection will be performed and documented for the purpose of evaluating the effectiveness of our work processes, identifying and correcting non-conforming work and ensuring the quality of the work will not be compromised.
