Renovation & Fitout

It's not living unless there's style

“

Where it all began...

At RD2 Design, we believe in stylish sustainable interior design & advocate for it in all our choices, from the brands we work with to our suppliers, logistics & most certainly in our design.

Common problems we face with:

- No idea on design you want?
- No Time to dedicate for design and execution
- How to combine and choose from larger material options?
- How to blend furniture and harmonize colors inside interior space
- How to meet the budget?
- Find good quality materials from reliable supplier

Every day we bend our backs to provide optimal solutions to your needs. Our mission is to create innovative, stylish and sustainable spaces and we envision our company's future as the inspiration for future generations of clients through our craft.
