

SPMC

Spencer Project Management and Consultancy

Landscape Architectural Consultancy Design and Supervision Services

INTRODUCTION

WELCOME TO SPENCER PROJECT MANAGEMENT AND CONSULTANCY – SPMC

Since our establishment in April 2016, we have delivered excellent experience based landscape and irrigation designs to our clients based in the UAE and selected projects abroad. With over 20 years of history of working in the landscape industry, we provide experienced and knowledgeable construction supervision and consultancy for your landscape projects.

At SPMC our aim is to create beautiful spaces which are both culturally and environmentally relevant. Our designs are sympathetic to the climate of the UAE where the importance of preserving the limited water resources in the region plays a big role in our designs. To actively address these challenges, we apply our extensive horticultural and irrigation knowledge when designing and selecting the best possible plant species and irrigation technologies for each of our client's projects. We believe that a landscape should enhance and elevate the area, community and environment in which it's located.

Each of our team members are professionally qualified and has the capability and know-how required to make your design projects the best they can be.

ABOUT US

BACKGROUND

SPMC is made up of a small group of landscape professionals who, having worked in the UAE for over 20 years, have solid knowledge of the A – Z of landscape design and implementation.
Our extensive knowledge and considerable landscape and irrigation construction experience, as well as landscape and irrigation design in the UAE, means that we are well qualified and positioned to advise our clients throughout the landscape design and construction process, offering valuable information regarding desirable, functional living spaces that respect local customs, wherever appropriate, regional water and environmental limitations and, importantly, obtain the best value for money landscape solutions.

APPROACH

Our aim is to deliver inspirational spaces and places that respond to the needs and aspirations of the proposed development, community and client. We aim to create projects that make a strong contribution to a sustainable future, by providing unparalleled commitment to design excellence on all projects, small or large.
Knowledge, experience, sustainability and passion is the backbone of all that we do. SPMC aspire to listen to clients, understand and predict their needs, and provide exceptional services.

OUR

Jeremy Spencer

Jeremy is an experienced Construction Design and Management professional. He has nearly 24 years of landscape construction and management experience in the UAE. He successfully fulfilled roles as the former operations and General Manager of large commercial landscape design and construction firms in the UAE before starting Spencer Project Management and Consultancy in early 2016. With this background and experience, he has developed SPMC into a reputable landscape and irrigation consultancy company serving both private clients and government agencies.

Lara de Wet

Holding a Masters degree (Cum Laude) in Industrial Psychology from Stellenbosch University, Lara is dedicated to applying psychological principles to enhance workplace environments and employee well-being. She has extensive psychometric experience and enjoys exploring the link between personality and how it manifests itself in the workplace. Her passion lies in cultivating a positive and productive workplace culture that empowers employees and supports the achievement of strategic business goals.

Alicja Jasinska

Alicja obtained her Master degree in Landscape Architecture in Poland with international experience from an exchange program and practice in a cosmopolitan design offices in Europe. She actively strives to develop further along with her profession. Through extensive travel opportunities, she has worked with a wide range of people of varying cultures. This has helped her to better understand different environments as well as clients' requirements whilst presenting sustainable alternatives during the design process. Alicja's rich site supervision experience in the UAE has developed her into a more rounded Landscape Architect offering practical solutions to challenging requirements.

Mahmoud Abudaqa

Mahmoud is a skilled and experienced landscape architect with over 10 years of expertise in the UAE. With a strong focus on public realm and irrigation design, Mahmoud has made significant contributions to the development and enhancement of urban landscapes in the region. Having completed a Master's degree in Landscape Architecture, he possesses a deep understanding of the principles and techniques required to create aesthetically pleasing and functional outdoor spaces. His background has provided him with a solid foundation in landscape design, environmental planning, and project management.

Ian Hussey

Ian graduated from the University of Surrey in 1984 with a BSc (Hons) in Civil Engineering. Since then he has gained extensive experience in the UK and since 1997, in the UAE in construction supervision and management. He has worked in a variety of fields including tunneling, roadworks, airfield construction and building works. Many of his projects have been marine based and he has acted as Resident Engineer on harbours and sea defences in the UK, Dubai, Abu Dhabi, Sharjah and the Sultanate of Oman. He is currently representing SPMC in the supervision of the marine works for the Khorfakkan Marine Research Institute project.

TEAM

Ian Venter

Ian is a results oriented landscape project manager with 17 years of experience in the landscape industry, of which 9 years have been within the UAE where he has managed landscape construction projects from private residences to Golf Courses. Besides having extensive horticulture related experience through the ownership of a family landscape business in South Africa, Ian specializes in the design and construction management of complex water features. His most recent role was the management of the Elephant Pool Lakes and Pump rooms at Sharjah Safari Park.

Jarrad Stevenson

Jarrad Stevenson brings over a decade of expertise in irrigation and landscaping to the table. As the founder and Managing Director of Disa Irrigation, he managed a myriad of projects from luxury villas to school fields. Notably, he revolutionised operational workflows with innovative systems, significantly boosting productivity. His leadership steered the company through challenging periods, including asset loss and global disruptions. Now at SPMC, Jarrad applies this rich experience and is eager to introduce similar efficiency-boosting techniques. As he takes on fresh challenges like coastal landscaping, his unwavering focus on quality control persists. With a B-Tech in Project Management and a National Diploma in Horticulture, Jarrad is a multifaceted asset to any venture, contributing across all company activities.

Wassam El Khoury

Wassam has gained extensive expertise working in diverse environments, including a significant period spent in Dubai. He is a seasoned Project Manager with over two decades of experience. He has been immersed in the landscape industry since 2001. His 10 years of experience in Dubai has provided him with a deep understanding of international landscape practices and an ability to navigate diverse cultural contexts. Wassam also actively managed Municipal construction projects in the City of Toronto, Canada from 2015 to 2023. Wassam brings international exposure and valuable knowledge, coupled with strong management expertise to SPMC. His collaborative approach, attention to detail, and passion for delivering high-quality results make him a valuable addition to the team.

Sanoop Muhammed

Sanoop has a bachelor's degree in agricultural engineering from Kerala Agriculture University, India, and 12 years of experience working on landscape and irrigation projects. Sanoop manages all of SPMC's irrigation design requirements as well as performs technical reviews of contractors drawing and ensures contractor's design compliance throughout the construction period.

Anish Vijay

Anish is a versatile and experienced landscape designer and draftsman with a Diploma in Civil Engineering and more than 10 years of UAE based landscape industry experience in drafting and designing across a variety of landscape projects and disciplines.
