SAFETY PROCEDURES

Venus Joinery maintains strict compliance with domestic and international regulatory safety standards and considers safety as a paramount during all stages of fabrication and fitting. Some safety equipment provided as per our safety protocols and effective in house standard operating procedures.

METHOD OF STATEMENT

The method statement describes the sequence of events from the receipt of order through the completion of the project. All works will be carried out in accordance with the agreed project quality plan. All procedures and processes will be as per the approved project and approved plan.

Upon receipt of the order or letter of intent, a project engineer will be given charge to handle the contract which includes project planning, design aspects, shop drawings, production, planning and installation planning. The project engineer will be fully responsible for the day-to-day project activities and will handle the project requirement as per the client need.

1. Responsibilities of Project Engineer

- To co-ordinate with main contractor.
- To ensure the progress of project as per the schedule.
- To co-ordinate with design section.
- To submit the required technical information and drawings for approval.
- To take decisions on technical issues.
- To manage procurement, manufacturing and installation program to co-ordinate with sub-contractor.

2. Sequence of Work

- Finalization of all technical issues, specifications and design with consultant and main contractor
- Design development and approval
- Shop drawings submission and approvals
- Procurements
- Manufacture
- Installation Program
- Material delivery to site-installation
- Inspection
- Handing over
- Handing over manuals
- The following will be the sequenced of work

3. Requirement for Initial Design

The following information has to be provided for Initial Design.

- Approved drawings of layout, elevation and section of the building.
Approved specifications
- All other relevant information's for general design. Co-ordination meeting with other relevant sub-contractor.

4. Design Aspect

The design is executed by well experienced designer based on the approved drawings given to us after the initial discussion with main contractor. Design drawings will be approved prior to the preparation of fabrication drawings. Design development drawings approval is required in due time to allow the procurement of raw materials and other components which may require long term delivery.

5. Shop Drawings

The shop drawings will contain elevation plans and section details, overall dimensions, material type, fixing details with location and detail to the primary structure. The drawings will be prepared based on the Material as per the technical data submittals. Finishing will be clearly mentioned in the drawing. Any modification required by the consultant can be incorporated in our revised drawing. Drawings will be approved, duly signed and confirmed in writing.

6. Technical Data

Technical data for all materials will be submitted in accordance with requirement along with supplier details.

7. Samples

The samples for all the materials used in the project will be submitted as per the contract requirement.

8. Fabrication Drawings

The fabrication drawings will be prepared for internal use in accordance with the approved shop drawing which indicates the profile size, cutting sizes assembly of components.

9. Finishes

All internal visible surfaces will be approved colors.

PROCUREMENT

Procurement of materials is done based on the requisition prepared by the design office in consultation with the project manager according to the contract specification. The company chooses the supplier based on their response to the specification of the product, quality and delivery time. We always try to obtain goods from the approved suppliers as defined in the project manual. Suppliers are responsible for the movement for the shipping of their material with necessary packing to prevent damages.

All the samples will be submitted for approval before placing the final orders with our suppliers.

SPECTRUM Car Design LLC 				

MODOMORO

Based in Dubai, Modomoro presents unique and adaptable designs to the millennial user in the over saturated furniture space. With modern living culture constantly under flux, we at Modomoro strive hard to craft furniture that blends in seamlessly with your space yet makes a statement.

As a team of designers, thinkers and artisans, we explore diverse styles for inimitable product personalities and contexts by translating modern ideas via artisanal techniques. We believe age old craftsmanship lends not only precision but also love to the product. Manufactured at our studio, we retail the furniture through our E-Commerce platform.

We believe in creating furniture that intrigues your imagination!
