

About Us

Green Dream Landscaping is a Dubai based team from 2006 that offers full service landscaping and provides consistent top level work with the highest quality plants and materials. Landscaping your home is a good investment, adding beauty and value to your property. Our services include garden design, indoor and outdoor water features, swimming pools, wood work, stone work, paving, children's playgrounds, maintenance and much more.

Managed and staffed by qualified engineers, we are a reliable, knowledgeable and professional company that stand behind our products and services.

We can guarantee that any work we do will meet your satisfaction.

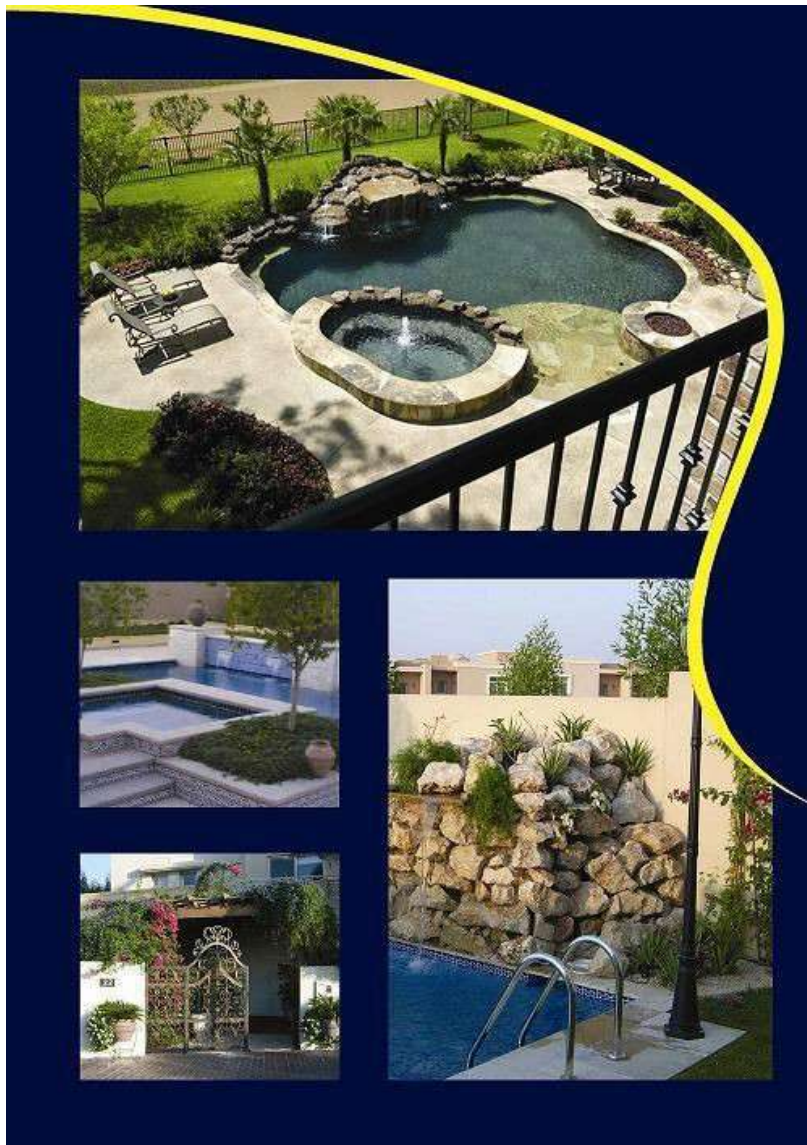

An oasis in your backyard...

Garden design, waterfalls, fountains, fish ponds, indoor and outdoor water features, swimming pools, trees, seasonal flowers, lighting, children's playground, gardening maintenance, barbeques, grills, outdoor kitchens, path

ways, driveways, patio and deck areas, wood work including arbors, pergolas, gazebos, fences, automatic irrigation systems, agricultural and insect protection, ceramic pots and outdoor lifestyle accessories.

Garden Design

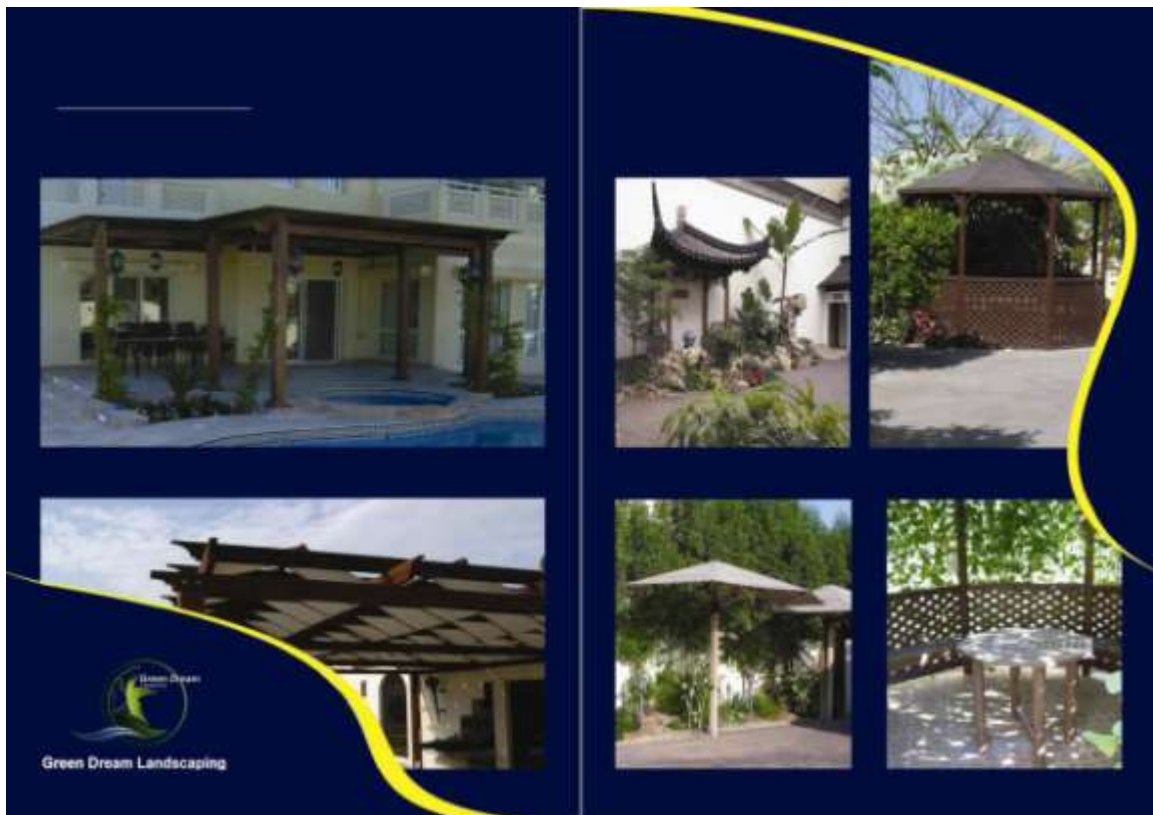

At Green Dream landscaping each of our designs are created with the client in mind but will maintain a level of sustainability, ease of maintenance, and functionality. We use color, texture and form to create an atmosphere that will fulfill our client's needs. Whether your taste is classical or modern, we are limited only by your vision. We can also design using Feng Shui to create a harmonious balance to your garden.

Wood Work

Wood is one natural element that no garden should be without. Arbors and pergolas can be inviting, social and cozy additions, providing places for you to entertain, or to just sit and enjoy the serenity of your landscaping. Fencing adds privacy and form to your yard.

Swimming Pool

A refreshing, shimmering pool is a proven source of relaxation and rejuvenation that provides years of entertainment and family fun. A swimming pool is also a profitable investment that will increase the value of your property.

At Green Dream Landscaping, we will work with you to design a pool shape that is compatible with your garden. We have several templates for you to choose from, but you are in no way limited to these shapes. We can help you to design a custom shape that meets your specific needs so you can enjoy the pool of your dreams for many years to come.

We use only the highest quality pumps, filters and waterproofing materials.

With a variety of tiles to suit any budget, you can confidently choose an interior finish that will enhance the beauty and enjoyment of your swimming pool.

Indoor Water Features

Bring nature indoors to transform your home into a peaceful and relaxing space with the addition of any of our beautiful indoor fountains and waterfalls.

Outdoor Water Features

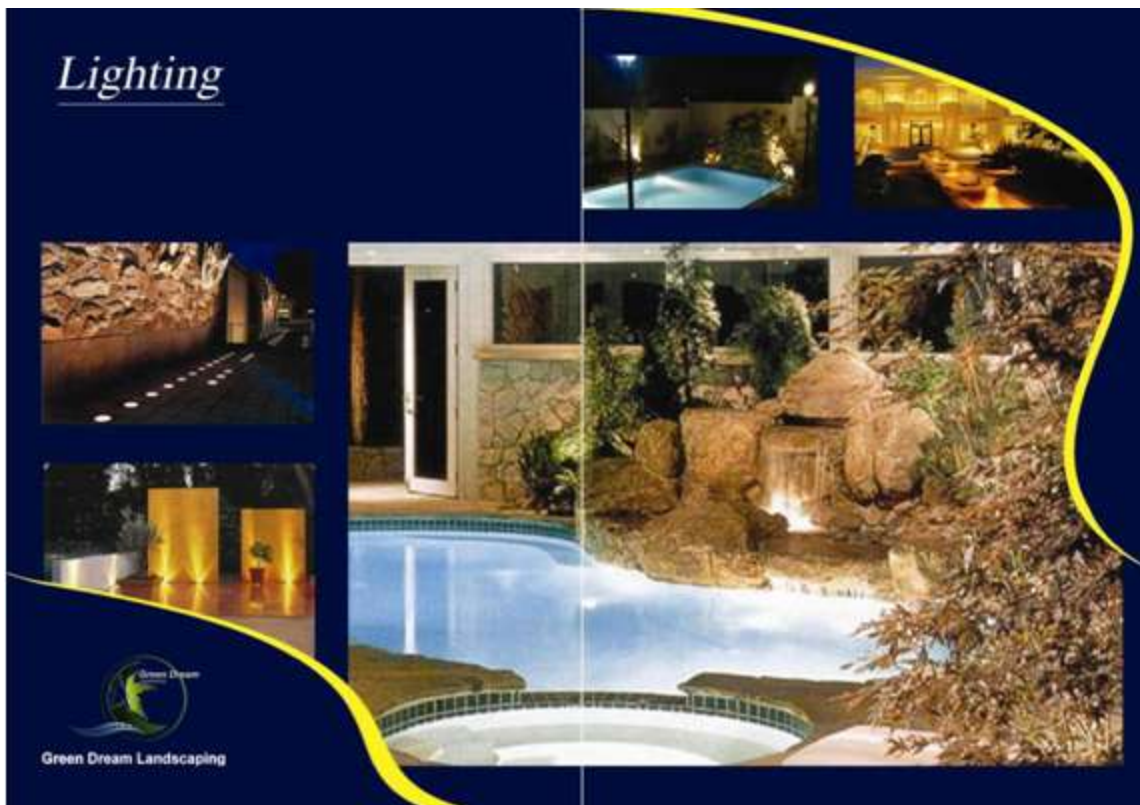

You will recognize the sense of contentment a tranquil pool can instill. Water inspires the human spirit and soothes our souls. Creating unique outdoor spaces is what landscaping is all about. Our custom designed water features can add significant outdoor interest. Small meditation ponds, a roaring waterfall, a large pond, or fountain aerators providing a relaxing natural ambience have become common components in many landscapes.

Lighting

Landscape lighting can literally shine the spotlight on your landscape design. In fact, some aspects of your landscaping take on a special beauty at night, if properly illuminated. Outdoor lighting also improves nighttime safety and security. Relax and enjoy your garden at all hours with our quality lighting fixtures.

Automatic Irrigation System

An automatic irrigation system protects and enhances your garden and landscaping investment. Adding to your leisure time and to the salability of your home makes this a wise purchasing decision.

Patio & Deck Areas

With your choice of several paving stone patterns and our quality mason workmanship, add beauty and interest to your yard with walkways, driveways and patios.

Children's Playground

Add to the family fun with a children's playground so that they can run, jump, swing and slide safely.

Plants, Trees and Shrubs

Using 2D and 3D software, we are able to design a garden based on your specific landscaping needs. We take into account the shape and size of your yard, the presence of water features and swimming pools to choose the perfect combination of plants and trees for your garden. Our software helps us to envision what your garden will look like with full growth in time. Using only the highest quality plants, we guarantee your satisfaction.

Garden Accessories

Complete your garden and add to your social engagements with a wide variety of garden accessories and patio furniture.

Maintenance

Maintenance is an important consideration to ensure the future of your landscaping investment. Landscaping does not end upon completion of project. To be sure that your plants thrive and your garden stays in peak condition, we recommend professional weekly maintenance.
